Light Textile, Food & Medicine

I. Project Name

Food Industrial Park Project of Weinan Economic & Technological Development Zone

II. Project Implementation Agency

Administrative Committee of Weinan Economic & Technological Development Zone

III. Project Description

The project is located at the central part of the development zone and it has a planned area of about 1000 mu. Positioning: it is planned to build a large-sized food industry cluster integrating food processing, packaging, logistics, research development and information exchange, with the modern food industry as main, related high technological industries on food as leading and green environmental protection and sustainable development as business concept.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 15 billion Yuan. Global food industry, food machinery industry and food packaging industry are invited to reside in and establish cooperation relationship

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, over 50 food enterprises may reside in and annual production value will be over RMB 500 million Yuan and tax contribution Over 100 million Yuan.

VI. Contact Information

Contact Person: Lei Xiqin

Telephone: 0913-8157777

I. Project Name

Industry City Integration Project of Dehydrated Fruits and Vegetables Processing City in Dali County

II. Project Implementation Agency

Administrative Committee of Dali County Economic & Technological Development Zone

III. Project Description

The project, having a planned area of 5km2 and relying on agricultural resources advantages of Dali County, is planned to build a national agricultural products processing new city and national industry and city integration demonstration zone. It mainly includes agricultural products processing cluster area with dehydrated fruit and vegetables processing as main, sci-tech innovation leading area with gathering processing technological resources of agricultural products as main and logistics and E-commerce area with the technologies of modern logistics and Internet of things as main and the industry and city integration demonstration zone with the third industry and life service as theme.

IV. Total Investment and Way of Cooperation

Total investment of the project is estimated to be RMB 5.5 billion Yuan. Way of cooperation: it faces the Huaxia Happiness Fund, China Merchants Shekou Holdings, COFCO for overall merchant recruitment.

V. Anticipation of Market and Analysis of Investment Return

The operation mode of industrial new city is an effective measure to arrange various production elements and promote the industry cluster. The project will innovate in the mode of investment promotion of Dali County Economic Technologies Development Zone. Based on the high-quality agricultural products resources of Dali County, it is to develop the modern food processing industry cluster with dehydrated fruits and vegetables as main, promote the coordinated development of related industries, constantly improve the industrial ecological environment with the enterprises as the core, making the development of Dali County Economic Technologies Development Zone a sample of "Industry City Integration".

I. Project Name

Chinese Ferment City Project

II. Project Implementation Agency

Administrative Committee of Weinan Economic & Technological Development Zone

III. Project Description

The project is located in the industrial concentration area of Weinan Economic Technologies Development Zone, covering an area of about 15,000 mu, and it has been built as the planting demonstration area, industrial cluster area and industrial core area. The planting demonstration area is mainly constructed to be an enzyme comprehensive demonstration zones with enzyme agriculture demonstration area, enzyme health city and other businesses integrating production demonstration and sightseeing tourism; the industrial cluster area is mainly constructed with enzyme production enterprise cluster area, which realizes scale effect and public production supporting services through industrial agglomeration, and incubates and cultivates a batch of internationally famous enzyme brands; the industrial core area mainly builds "one museum, one platform and six centers" to build domestic first-class enzyme industry supporting service facilities so as to build the brand enzyme production demonstration base and high-quality enzyme distribution center trusted by the Chinese people.

IV. Total Investment and Way of Cooperation

Total investment is RMB 10 billion Yuan. Global enterprises of production, scientific research and supply related to ferment are invited to reside in.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed and put into use, it can hold over 60 enterprises, develop 10,000 ferment dealers and realize sales volume of RMB over 10 billion Yuan.

I. Project Name

Food Industrial Park Project (Xi'an)

II. Project Implementation Agency

Administrative Committee of Xi'an Economic & Technological Development Zone

III. Project Description

Relying on the Tsingtao Beer, China Resources Beer (Holdings) Company Limited and other flagship food and beverage enterprises, the project is planned to build 3000 mu of food industrial park and introduce food and beverage enterprises, building a modern food industrial cluster area integrating food processing, manufacturing, circulation, research development and industrial tourism.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 10 billion Yuan.

Way of cooperation: unrestricted.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed and put into production, it will realize annual production value of RMB 15 billion Yuan.

I. Project Name

Traditional Chinese Medicine Industrial Sci-Tech Valley of “One Belt and One Road”

II. Project Implementation Agency

Medicine King Mountain Administration Office

III. Project Description

The project is mainly to build Traditional Chinese Medicine Sci-Tech Park with total construction area of 234880m², Traditional Chinese Medicine Production Demonstration Area with total construction area of 287190 Comprehensive Reform Pilot Area of Traditional Chinese Medicine with total construction area of 350820 m², traditional Chinese Medicine Logistics Center of “One Belt and One Road” with total construction area of 142150 m², matched service facilities with total construction area of 19400 m².

IV. Total Investment and Way of Cooperation

Total investment is RMB 65 billion Yuan. Way of cooperation: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

With the help of the “King of Remedies” brand, we will vigorously develop pharmaceutical R & D, production, processing and logistics industry, improve the participation and benefits of local farmers in industrial development, so as to increase farmers’ income steadily in a long term and boost the revitalization of scenic spots.

VI. Contact Information

Contact Person: Zhao Suilong

Telephone: 0919-6603512

I. Project Name

China Xixiang Han-styled Garment City Project

II. Project Implementation Agency

Office of Xixiang County Recycling Economic Industrial Park

III. Project Description

Xixiang County Circular Economy Industrial Park is planned to cover 11 square kilometers to build “China Xixiang Han-styled Garment City Project”. The space layout and supporting facilities of Han-styled Garment City Project are planned with high standard. The plan covers an area of 500 mu, with an investment of 2.2 billion Yuan in the first phase, which will be mainly used in construction of supporting infrastructure such as roads and workshops, and the second phase of investment is 3 billion Yuan which will be used to construct logistics base, cultural creative center, e-commerce center, exhibition center, testing center, R & D hall and other facilities, in order to advance the sound and rapid development of Xixiang textile and garment industry, and build the Han-styled Garment City into a clothing distribution center and clothing processing center of the central and western regions with complete industrial chain and through supporting facilities.

IV. Total Investment and Way of Cooperation

Total investment is estimated to be RMB 5.2 billion Yuan. Way of cooperation: BT, joint stock system, joint venture or BOT.

V. Anticipation of Market and Analysis of Investment Return

Clothing industry has huge market both at home and abroad. Although unlike other emerging industries, it is still irreplaceable. Due to the increase of per capita disposable income, people’s consumption of clothing is bound to increase constantly, and the market prospect is bright. It is expected to recover the investment in 3-5 years.

VI. Contact Information

Contact Person: Wang Boyuan

Telephone: 0916-318286

I. Project Name

R & D Aggregation Base of Biological Medicine Industry Project in the High-Tech Industries Development Zone

II. Project Implementation Agency

Administrative Committee of Xi'an High-Tech Industries Development Zone

III. Project Description

The R & D aggregation base of biological medicine industry is located in Caotang Science and Technology Industrial Base of High-tech Zone. It is adjacent to West Sixth Road of Qinling Mountains in the north and Caotang 3rd Road in the west, covering an area of 201 mu, with a total construction area of about 176,000 square meters, consisting of 27 single standard factory buildings and supporting service buildings. Among them, there are 3 public experimental platforms, 1 comprehensive service building with office, multi-function hall and exhibition hall; 1 exhibition center, and 1 staff dormitory building used as expert apartment, in addition there are business restaurant and staff restaurant. A perfect cultivation hardware environment shall be formed to meet the requirements of biological medicine in R & D, pilot test, production, sales and other links.

IV. Total Investment and Way of Cooperation

Total investment is RMB 5 billion Yuan. Way of cooperation is unrestricted.

V. Anticipation of Market and Analysis of Investment Return

It is expected to gather a number of engineering technology centers and famous experts and professors with innovative technology R & D capacity to build professional biomedical service system guided by high-end biomedical research and development. Aimed at improving the foundation of biological medicine industry, provide the best industrial environment for innovative and entrepreneurial enterprises, attract enterprises in the industry to settle down, and form a biological medicine industry chain with distinctive features and leading technology, covering R & D, pilot-test, production, sales and other links. Finally, it will become a well-known R & D and production base for biological medicine in China, and become the core of a hundred billion-level biological medicine industry cluster with strong competitiveness, and become a new bright spot in the professional field to promote the regional biological medicine industry.

I. Project Name

Food Industrial Park Project (Xingping)

II. Project Implementation Agency

Xingping Industrial Park

III. Project Description

Relying on the advantages of resources, location and transportation in the food park, three parties give full play to their respective advantages, carry out multi-directional cooperation and establish close cooperation relationship. Through resource integration focusing on food industry such as grain and oil, the whole industrial chain of food deep processing is formed. "Xingping Provincial Food Industrial Park" will be built to make the city become the largest main distribution center of food processing as well as grain and oil trade in Northwest China.

IV. Total Investment and Way of Cooperation

Total investment is RMB 50 billion Yuan. Way of cooperation: joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will introduce over 50 middle and high-end food processing enterprises and build the largest food processing and grain and oil trading distribution base in Northwest China. The annual production value is estimated to be over RMB 8 billion Yuan.

VI. Contact Information

Contact Person: Yan Jiansheng

Telephone: Chief of Xingping Industrial Park

I. Project Name

Paper Food Packaging Project

II. Project Implementation Agency

The People's Government of Wugong County

III. Project Description

The project is located in the Industrial Park of Wugong County, covering a planned area of 500 mu. It mainly relies on paper packing enterprises such as one of Asia's largest household paper production and marketing companies invested by Indonesia Sinar Mas Group, Gold Hongye Paper Group Co., Ltd., one of the top ten enterprises in the world paper industry, Dongfang Paper Group and Shaanxi Xinrong Paper Co., Ltd., one of the three major raw pulp papermaking enterprises in Shaanxi Province, to extend the industrial chain and build the aircraft carrier cluster of fine paper industry in Northwest China. Our county plans to attract domestic and foreign well-known paper and food packaging enterprises and production enterprises from upstream and downstream of the industrial chain to settle down, and continuously build a pollution-free, low energy consumption, high efficiency, low-carbon, green and environmental protection paper industry cluster in western of China.

IV. Total Investment and Way of Cooperation

Total investment is planned to be RMB 3 billion Yuan. Way of cooperation: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The investment recovery period is about 5 years. It is estimated that annual yield will be RMB 600 million Yuan.

VI. Contact Information

Contact Person: Shi Xuehong

Telephone: 17791009113

I. Project Name

Food & Beverage Industrial Park Project

II. Project Implementation Agency

Seastar Group

III. Project Description

The project covers an area of 500 mu with a total construction area of about 380,000 square meters. It is divided into food processing zone, beverage processing zone and supporting industrial zone. Production workshop, cold chain logistics workshop for raw materials and finished products, office facilities, product inspection and quarantine facilities and product exhibition and trading center will be constructed while constructing other public service facilities.

IV. Total Investment and Way of Cooperation

Total investment is planned to be RMB 30 billion Yuan. The project adopts the sole investment mode preferentially. Enterprise's residing includes standard workshop leasing, workshop's agent construction and enterprise's self-construction.

V. Anticipation of Market and Analysis of Investment Return

Combining the agricultural product resources and industrial background of Baoji City and Chencang District, relying on leading enterprises such as Tsingtao Beer and Tianxiang Food, taking modern food and beverage processing as the main body, supported by the high and new technologies related to food, the zone takes green environmental protection and sustainable development as the management idea, actively introducing supporting industries such as food processing, beverage processing and packaging, and devote itself to build the first green food industry professional park as well as a standardized, professional and intensive industrial development platform in Baoji City.

VI. Contact Information

Contact Person: Du Yemin

Telephone: 0917-6216780

I. Project Name

Traditional Chinese Medicine Industrial Park Project

II. Project Implementation Agency

Administrative Committee of Tongchuan High-Tech Industries Development Zone

III. Project Description

There are 5 traditional Chinese medicine enterprises and one medicine project under construction in the Tongchuan High-Tech Industries Development Zone. In order to integrate the medicine resources and promote enterprise cooperation, it is planned to build the Traditional Chinese Medicine Industrial Park. Having a planned area of 430 mu, it is planned to build a core functional area, talent cluster area, matched educational area, sci-tech achievements translation base, traditional Chinese medicine exchange platform, demonstrative experiencing area and production and processing area and etc. it is planned to introduce 10-15 medicine enterprises.

IV. Total Investment and Way of Cooperation

Total investment is RMB 3000 million Yuan. Way of cooperation: joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be RMB 5 billion Yuan and profit will be RMB one billion Yuan.

VI. Contact Information

Contact Person: Yang Jinlong

Telephone: 0919-3186012

I. Project Name

Selenium-enriched Food Processing Project

II. Project Implementation Agency

Hanbin District Investment Promotion Center

III. Project Description

Hanbin District is located at the famous selenium-enriching belt of China. Its soil and underground water contain rich selenium elements. Most part of crop, raised livestock and aquatic products in the territory have the effect of selenium supplementary. The project is planned to build the selenium-enriching miscellaneous grain base and tea beverage production line. It is to pack high-quality selenium-enriching rice, selenium-enriching soybean, selenium-enriching small red bean; selenium-enriching product development: it is to build the production lines of preserved sweet potato, chopped potato, fine buckwheat powder, dried buckwheat noodle, corn paste, bean powder, bean sauce and selenium-enriching edible fungus.

IV. Total Investment and Way of Cooperation

Total investment of the project is planned to be RMB 2 billion Yuan. Way of cooperation: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual increased production value will be RMB 3 billion Yuan, it will newly increase jobs for 10,000 persons. The investment recovery period is estimated to be 5 years.

VI. Contact Information

Fax: 0915-3189877

I. Project Name

Shanyang Henghuan Low Molecular Heparin Sodium Series Product Project

II. Project Implementation Agency

Shanyang County Henghuan Biological Technology Co., Ltd.

III. Project Description

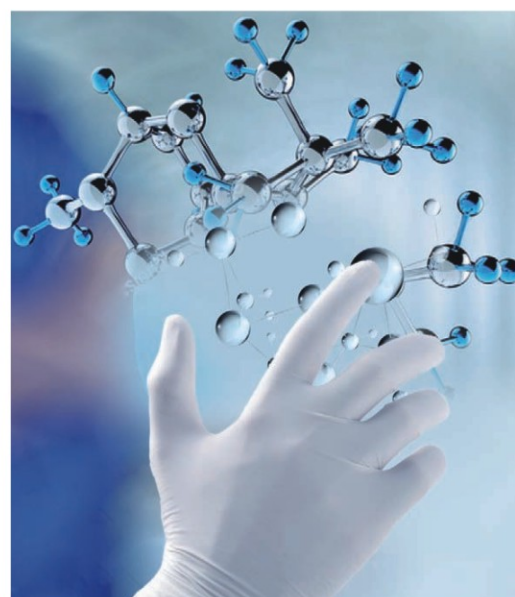

The project, covers an area of 150 mu in Shanyang Industry Cluster Area, is planned to build a production line for purification and processing of Low-molecular-weight Heparin Sodium. It can produce 800 billion units of Low-molecular-weight Heparin Sodium, used for producing Enoxaparin sodium injection, Dheparin injection, Naqu heparin calcium injection, Heparin cream, Heparin blood-collecting tube and other products. At the same time, more than 5,000 kg of bilirubin, amino acids and insulin were extracted from raw materials such as pig gall bladder, pig hair and pig pancreas.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB one billion Yuan. Way of cooperation: Joint venture, cooperation or other ways.

V. Anticipation of Market and Analysis of Investment Return

As one of the most widely used and effective anticoagulant and antithrombotic drugs in clinical practice, heparin drugs occupy an important position in the international medical market. The demand on crude heparin, raw material medicine and heparin preparation will reach over 1500 tons (about 175 trillion units). The market scale of heparin sodium of the whole world will reach USD 20 billion, an increase of 30-40%. The demand is very strong. It will drive the rapid development of the relevant heparin industry. Its market space is huge, the development prospect is broad. After the project is completed, annual sales income of RMB 1.2 billion Yuan, and profit and tax of RMB 375 million Yuan.

VI. Contact Information

Contact Unit: Shanyang County Henghuan Biological Technology Co., Ltd.

Contact Person: Tong Dan

Telephone: 18209148898

Address: Shanyang County Industry Cluster Area (East Jingsi Road)

I. Project Name

Jew's-ear Edible Fungus Deep Processing Project of Zhashui County

II. Project Implementation Agency

Shaanxi Zhongbo Agriculture Technology Development Co., Ltd.

III. Project Description

Construction of annual processing of Auricularia auricula series products of 2 million tons, supporting Jinfeng fungus Internet digital center, northwest agaric market, 20 million bags of fungus packaging production line, beverage workshop, jelly candy workshop, expanded leisure food workshop, mushroom sauce workshop, packaging workshop, warehouse, comprehensive building, R & D center and other service facilities.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 170 million Yuan. Way of cooperation: joint venture.

V. Anticipation of Market and Analysis of Investment Return

Auricularia auricula is black brown, with soft and gelatinous touch. It is thin and elastic, which becomes translucent when wet and shrinks to crisp hard horniness when dry. Auricularia auricula tastes delicious, and it is vegetarian but nutritious. It tastes sweet and mild in nature which has medicinal effects, such as replenishing qi and strengthening body, activating blood circulation, and preventing iron deficiency anemia, etc. It can nourish blood with beautified effect, which makes skin rosy. It can dredge stomach and intestines, lubricate intestinal tract, and also help patients with hypertension, with promising market prospect. After the completion of the project, more than 150 new jobs will be added, which will drive the employment and income increase of more than 400 people, and more than 200 households started auricularia auricula planting. The annual tax has reached 10 million Yuan, which can effectively promote the high-quality development of county economy.

Modern Agriculture

I. Project Name

Construction Project of 10,000 mu of Flower Base of Ziyang County

II. Project Implementation Agency

Ziyang County Investment Promotion Center

III. Project Description

2000 pieces of pot flower, 3.2 million pieces of cut flower, 35000 pieces of bonsai, 500,000 tons of dried flower and 15 tons of flower seeds.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 3000 million Yuan and it will be obtained through investment promotion. Sole investment or joint venture is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, the sales income in normal year will reach RMB 2700 million Yuan, profit after tax will be RMB 600 million Yuan. It has good economic benefits.

VI. Contact Information

Contact Person: Kang Haizhen

Telephone: 0915-4426306

I. Project Name

Construction Project of Edible Fungus Base and Processing Plant in Luonan County

II. Project Implementation Agency

Bureau of Agriculture and Rural Affairs of Luonan County

III. Project Description

The project is planned to build 20 edible fungus planting base, 20,000 standard edible fungus greenhouses, develop 200 million bags of edible fungus, build baking workshop, cold chain warehousing and fungus exchange market auxiliarily, build an edible fungus plant through investment promotion.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 2.89 billion Yuan. Way of cooperation: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

Edible fungi are edible large fungi, organic, nutritious and healthy green food, one of the main protein foods of human beings in the 21st century, commonly seen in everyone's daily dining table. In recent years, the industry of lentinus edodes and other edible mushroom products, featured by the advantages of small investment, short period, quick effect, stable price rise, and good market prospects, not only meets people's consumption growth and sustainable agricultural development needs, but also is an effective way for farmers to get rich quickly. After the project is completed, it is estimated that annual sales income will be RMB 700 million Yuan and profit and tax RMB 150 million Yuan.

I. Project Name

Persimmon Series Products Deep Processing Project of Fuping County

II. Project Implementation Agency

The People's Government of Fuping County

III. Project Description

The project, introducing advanced production equipment, is to realize persimmons' full-automatic peeling, artificial intelligence drying. Its whole process adopts sterile cleaning. The persimmon cake and persimmon vinegar may be produced. The persimmon tannin from persimmon skin may be extracted. It focuses on the deep processing of feed additive and the research development of dried fruit and vegetables products.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 1.5 billion Yuan. Enterprise's sole investment or the cooperation between the government and enterprises is accepted.

V. Anticipation of Market and Analysis of Investment Return

The construction of the project may provide jobs for over ten thousand persons and further enhance the popularity of "the Hometown of Persimmon of China".

I. Project Name

Whole Industrial Chain Development and Using Project of Kiwi Fruit in Lan'gao County

II. Project Implementation Agency

Bureau of Agriculture and Rural Affairs of Lan'gao County

III. Project Description

Lan'gao County is located in the subtropical climate zone at the southern foot of Qinling Mountains. It is rich in Hanjiang branch water system resources and selenium-rich mineral resources, which constitute the unique natural conditions for kiwifruit growth. In this project, 8000m² kiwi fruit juice, wine and preserved fruit processing plant will be built, as well as production workshop, product warehouse, raw material warehouse, 15,000m³ cold storage, and comprehensive building and supporting infrastructure will be built. 150 sets of instruments and equipment will be purchased, and 1 green certification and 5 organic certifications will be completed.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 540 million Yuan. Sole investment, shareholding, stock participation or hybrid investment is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it enjoys No. 21 File of "Detailed Rules of Lan'gao County on Enhancing Investment Promotion" (LZBF [2018]) and related preferential policies. It is estimated that annual kiwi fruit treatment capacity is 50,000 tons, the annual sales income in normal year will be RMB 200 million Yuan, net profit RMB 80 million Yuan. The investment recovery period is 6.8 years. It will provide job for over 600 persons.

I. Project Name

Standardized Traditional Chinese Medicine Planting Base and Its Processing Project in Luonan County

II. Project Implementation Agency

Luonan County Bureau of Forestry

III. Project Description

Taking advantage of the resources of Chinese medicinal materials such as Forsythia suspensa, Platycodon grandiflorum, Radix Isatidis, parsley, Atractylodesmacrocephala, honeysuckle, Gastrodiaelata and Polyporusumbellatus in Luonan, it is proposed to attract 1-2 Chinese herbal medicine processing enterprises to build production lines of Chinese medicinal materials such as pre-treatment, decoction pieces, granules and preparations, and support the construction of drug source base, storage, logistics and other facilities.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 500 million Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

The herbal medicine source area around Luonan County is large. There are 470,000 mu of traditional Chinese medicine base (including 200,000 mu of artificial cultivation and 270,000 mu of wild resources). It has the advantages of sufficient raw material supply, low transportation cost and small market competition. Additionally, the production of traditional Chinese medicinal materials has high economic value and considerable profits. With people's attention to health industry, there will be a great space for the development of traditional Chinese medicinal materials. After the project is completed, it is estimated that it will realize sales income of RMB 500 million Yuan, profit and tax of RMB 200 million Yuan. The investment recovery period is 3 years.

I. Project Name

Gaodong Se-enriched Agriculture Ecological Park

II. Project Implementation Agency

Shaanxi Gaodong Industry Development Co., Ltd.

III. Project Description

The project is planned to newly build the base of 6850 mu for tea, fruit and vegetables planting, sightseeing and science popularizing, 4888 m2 of room for production and warehousing, 6800 m2 of reception and exhibition and marketing center, 600 m2 of office and service, 500 m2 of Minshuku, 26km of road for production and sightseeing, 5 scenic pavilions, 2km of plank road, reconstruct 100 farmer Minshuku, harden 33000 m2 of ground, build green area of 93200 m2, purchase 98 sets of production equipment, build a drinking water production line with annual output of 211000 barrels (4L/barrel), build a drinking water production line with annual output of 63.5 million bottles (550 ml/bottle), 2 production lines with annual output of 500 tons tea, implement the matched facilities involving water supply and drainage, power supply, agriculture irrigation, water source protection and amusement facilities.

IV. Total Investment and Way of Cooperation

Total investment is RMB 538.3 million Yuan. Enterprises’ sol investment or cooperation between government department and enterprises is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the Park is completed, the production value of agricultural products will be twice higher than before after the optimization and planting. It does not only increase the GDP of Shuang’an Town, but also increase the tax and profit contribution.

I. Project Name

Oil Peony Comprehensive Utilization Project

II. Project Implementation Agency

Xunyang County Investment Promotion Center

III. Project Description

The project takes 10,000 mu of oily peony resources in Xunyang County as raw materials and it will be built by three stages. In the first stage, it is planned to newly build a peony oil production line with annual output of 3000 tons; in the second stage, it is to newly build oily peony series cosmetic production line (involving sunburn, skin care product, hair wash, hair care), in the third stage, it is planned to expand the production line of peony case, peony flower, seeds, leaf, bud and root. Having a planned area of 80 mu, it is planned to locate at county industrial area. The construction period is 3 years. The investment in the first stage is planned to be RMB 350 million Yuan.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 500 million Yuan. Sole investment or joint venture is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the first stage of the project is completed, it can produce 3000 tons of peony oil. If it is calculated by the market price of recent years (300,000 Yuan/Ton), the production will reach RMB 900 million Yuan.; if the production cost is 75% of the total production value, it will be RMB 675 million Yuan and annual profit RMB 225 million Yuan. If the income tax is calculated by 25%, annual net profit will be RMB 168.75 million Yuan and the profit rate of the investment is 48.21%.

I. Project Name

Construction Project of Danfeng County
Mushroom Industrial Park

II. Project Implementation Agency

Danfeng County Investment Promotion Center

III. Project Description

Adopting the benefit mode of “Company+ Cooperatives+ Farmers”, the project is planned to build the mushroom industrial park of whole industrial chain, integrating mushroom cultivation, mushroom fungus bar production, base planting, product process, waste bar recovery and waste bar recovery and organic fertilizer production and its related supporting facilities. At present, the overall plan has been prepared.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 150 million Yuan. Way of cooperation: sole investment, joint venture or others.

V. Anticipation of Market and Analysis of Investment Return

CPC Danfeng County Committee and Government takes edible fungus industry with mushroom as main as one of the eight targeted poverty alleviation industries, which lays a solid foundation for the development of the mushroom industry. Mushroom is the second largest edible fungus of the world and it is also one of specialties of our country. It also has the reputation of dried delicacies in the folk world. It contains 6 kinds of amino acid, vitamin, iron, Potassium (K) and other microelement required by human being. It features delicious taste, fresh taste and rich nutrition. It has the fame of “plant empress”. Danfeng County belongs to the transition area of semi-tropical and warm temperate zone. It is optimal to mushroom. The raw material for production is guaranteed. After the project is completed, annual production value will be RMB 140 million Yuan, profit and tax RMB 47 million Yuan and promote 3500 farmers to realize income increase.

I. Project Name

Modern Characteristic Agriculture Project

II. Project Implementation Agency

The People’s Government of Wugong County

III. Project Description

The project adopts land transfer mode within the whole county, with a planned area of 1,000 mu, mainly focusing on the comprehensive development of local advantageous agricultural resources, supporting the development of characteristic agriculture, establishing production base of characteristic agricultural products and modernized agricultural base, promoting the opening up and export of characteristic agriculture and modern agriculture, developing healthy food, green food and organic food, enhancing competitiveness of agricultural products and speeding up the development of export-oriented agriculture. It will develop advantageous varieties and advanced techniques with independent intellectual property rights, boost the transformation of scientific and technological achievements of featured agriculture and modern agricultural new technologies, and accelerate agricultural technology progress. Besides, supporting industries may integrate new variety demonstration, picking leisure, smart orchard, fruit industry exhibition, e-commerce experience, logistics distribution and other characteristic functions. It is planned to attract projects such as modern facility agriculture, organic pollution-free agriculture, circular ecological agriculture, characteristic tourism and sightseeing agriculture, characteristic leisure farm, etc. to build a high-standard characteristic modern agricultural base, improve the comprehensive competitiveness and market share of modern agriculture, so as to further increase farmers' income.

IV. Total Investment and Way of Cooperation

Total investment of the project is planned to be RMB 7 billion Yuan. Cooperation, joint venture or sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

The investment recovery period of the project is about 10 years and it is estimated that annual yield will be RMB 700 million Yuan.

The 2nd Stage of Modern Agriculture Industrial
Park along Xingwei Avenue of Xingping City

II. Project Implementation Agency

Xingping Agriculture & Forestry Bureau

III. Project Description

Basic Information of Stage II of Modern Agriculture Industrial Park of Xingwei Avenue: On the basis of successful implementation of Stage I of Xingwei Avenue Modern Agriculture Industrial Park, Xingping City plans to transfer another 13470 mu of land to implement Phase II Project. Details are as follows: Construction area: Phase II Project of Modern Agricultural Park of Xingwei Avenue in Xingping City starts from Tongcun Road of Zhuangtou Village to Nanyu Village to Tongcun Road of Yikong Village in the east, Xhuan Township Road of Zhuangtou Town in the west, Xi'an-Baoji Expressway in the north and Ginkgo Forest in Xingping (Macun Village, Zhuangtou Town) in the south. It covers a total area of 15,880 mu (about 6,100 meters in length and 1,800 meters in width) and 13,470 mu of transferable land. Construction content: It is divided into three functional areas: High-tech agricultural area of 4,180 mu; facility agricultural area of 4,590 mu; ecological sightseeing area of 4,700 mu. It is mainly the land of Liushun Village, Zhuangtou Village, Sanwu Village, Laoguan Village, Baijiakong Village, Nanyu Village, Macun Village and Yikong Village of Zhuangtou Town.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 5000 million Yuan. Sole investment is adopted.

V. Anticipation of Market and Analysis of Investment Return

After the Park is completed, the benefits from the operation of tourism sightseeing, catering service and other industries will be RMB one billion Yuan a year.

I. Project Name

Construction Project of Astragalus Industry Integration of Zizhou County

II. Project Implementation Agency

Bureau of Agriculture and Rural Affairs of Zizhou County

III. Project Description

Astragalus membranaceus, Scutellaria baicalensis, Bupleurum Bupleurum, Polygala polygala and other varieties with good nourishing effect and economic value will be selected to establish 300 mu germplasm resource nursery and 2000 mu breeding base for fine seeds in the suitable ecological environment. It will establish 5,000 mu of simulated wild tending experiment demonstration base and 6,000 mu of field standardized planting experiment demonstration base. Stressed the core of Miaojiaping Town, Huainingwan Town, Matigou Town, Sanchuankou Town and Tuoerxiang Township, the development of standardized and industrialized planting bases in surrounding towns and towns will be promoted. Up to 2023, the standardized planting base of Chinese medicinal materials will reach 200,000 mu.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 5 billion Yuan, of which, the investment of RMB 3 billion Yuan is for the construction of the traditional Chinese medicine Test and Demonstration Base Yuan and RMB 1.5 billion Yuan is for the construction of warehousing, logistics and processing base and the investment of RMB 500 million Yuan is for sales market. Way of cooperation: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

The preserved area of traditional Chinese medicine in the county is 200,000 mu (including 60% of Astragalus membranaceus), with the output of more than 6000 tons and the output value of about 280 million Yuan. The planting history of Astragalus membranaceus in Zizhou has been for thousands of years (historically known as Beiqi, belonging to Mengqi in two kinds of Astragalus membranaceus). Astragalus membranaceus of Zizhou is the only product conforming to the export standard among the six major Astragalus producing areas in China and is exported to Southeast Asia, Japan and South Korea and other areas.

Potato Deep Processing Project of Jingbian County

II. Project Implementation Agency

Jingbian County Investment Promotion Center

III. Project Description

Jingbian potato has the characteristics of big size, even body, shallow bud eye, high starch content, short growth period, wide adaptability, strong resistance to adverse conditions, high yield and high quality, smooth and bright skin, good taste and good palatability, etc. It is approved as national geographical indication product. At present, the planting area of potato in the whole county is about 560,000 mu, with the total output of over 100,000 tons. It is proposed to introduce the deep processing project of potato, mainly including raw material warehouse, storage yard, comprehensive warehouse, production workshop, quick-freezing workshop, cold storage, finished product warehouse, laboratory and relevant supporting facilities, as well as purchasing fresh potato chip production line and quick-frozen potato chips production line, etc. This project will have great development potential.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 2 billion Yuan. Way of cooperation: sole investment.

V. Anticipation of Market and Analysis of Investment Return

Potato, as the fourth largest food crop after wheat, rice and corn, is also an important cash crop with high protein content, rich in vitamins and minerals, as well as the effects of anti-aging, beauty, constipation prevention and cancer prevention. It is a good medicine and high-quality health care product for patients with stomach and heart disease. Potato food has become a kind of current consumption fashion, and its market prospect is promising.

III. Project Description

The project, covering an area of over 900 mu, is located at Jincheng Avenue of Weinan High-Tech Industries Development Zone. It is planned to build the first automobile post-market service and automobile culture consumption complex in Gold Delta of Yellow River in “Culture, Experiencing and one stop”, covering 37 4S car brand shops, 20,000 m² of automobile comprehensive exhibition hall, 70, 000 m² of automobile parts decoration market, automobile culture theme park, automobile experiencing road, office, hotel and matched business facilities. Up to now, the road for driving experience has been completed. Steel structure of the body works of the comprehensive exhibition hall of 20,000 m² has been completed. The body of the foundation of the office room and spare room has been completed. The road, rainwater pipe and comprehensive pipeline engineering (electricity, tap water and optical fiber) has been built basically completely.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 2 billion Yuan. 4S shop dealers of various car brands are invited to reside in.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, the sales income of the Park will reach RMB 10 billion Yuan, profit and tax RMB 400 million Yuan. It may solve over 10,000 persons' employment. It is estimated that the volume of daily visitors flow will be 8000 and volume of car flow is 5000.

I. Project Name

Business Logistics Park Project in Weinan Economic Technologies Development Zone

II. Project Implementation Agency

Administrative Committee of Weinan Economic & Technological Development Zone

III. Project Description

The logistics park is located in the west of Weinan Economic and Technological Development Zone. It covers a planned area of 5 square kilometers and a long-term planning area of 10 square kilometers. With flat terrain, superior location and convenient transportation, it has “four horizontal and five vertical” traffic network with Guanzhong Loop Line as the axis, putting roads, water supply and drainage, strong and weak electricity and other infrastructure facilities in place. In 2011, Weinan Economic and Technological Development Zone entrusted Xi'an University of Architecture and Technology to establish detailed regulations on control over the logistics area, which are divided into 9 functional plates including administrative office, commercial service, professional market, living warehouse, production warehouse and transportation service, to give priority to three industries such as furniture and building materials, auto trade, agricultural and sideline products deep processing.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 3 billion Yuan. Big logistics enterprises of the whole country are sincerely invited to reside in the park and establish the cooperation relationship.

V. Anticipation of Market and Analysis of Investment Return

After all sub-projects are completed and meet their production target, annual sales income of RMB 400 million Yuan will be realized.

Advanced Manufacturing

I. Project Name

Fuping County Automobile Industrial Base Project

II. Project Implementation Agency

The People’s Government of Fuping County

III. Project Description

The zone is planned to cover an area of about 2,000 mu. Around the zone, there exists the R & D and manufacturing of new energy commercial vehicles, core parts and its supporting products, as well as related science and technology industries and production services of cloud computing, big data, electronic information, artificial intelligence and so on, so that the auto parts demand of automobile manufacturing enterprises such as Shaanxi Automobile, BYD, Fast Auto Drive, Geely Auto and Skywell around the park can be met. It will introduce high-end and influential core parts enterprises in new energy area to build the R & D and production base of new energy buses, new energy cars, power battery group and its relevant industrial chain.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 8 billion Yuan. Enterprise’s sole investment or cooperation between the government departments and enterprises is acceptable.

V. Anticipation of Market and Analysis of Investment Return

The project will provide job for over 800 persons, build the research & development, production and matched bases of automobile industry.

I. Project Name

Track Engineering Vehicles R&D, Achievement Translation and Its Production Line Project of Baoji City

II. Project Implementation Agency

Jintai District Investment Promotion Bureau

III. Project Description

Having a covered area of 2000 mu, the project is planned to build the research and development center for rail transit vehicles, modern production lines and supporting facilities of production, office and life. After the project is completed, it mainly focuses on the study, technology overcome and production of new-type rail transit vehicles.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 5.57 billion Yuan. Way of cooperation: cooperation, joint venture or sole investment.

V. Anticipation of Market and Analysis of Investment Return

Rail transit equipment belongs to the important part of high-end manufacturing field of China. It is also one of industries with highest innovation degree and international competitiveness. With continuous advancement and export of rail transit of our country, the development advantage is obvious, the potential is great and the development prospect is broad. After the project meets its production target, the annual production value will be RMB 12 billion Yuan and total profit and tax will be RMB 3.91 billion Yuan.

I. Project Name

Juchuang Power Battery Research and Development and Production Base Project

II. Project Implementation Agency

Shenzhen Hongpeng New Energy Technology Co., Ltd.

III. Project Description

Shenzhen Hongpeng New Energy Technology Co., Ltd. specializes in the R&D, manufacturing and sales of lithium battery and battery system for new energy vehicles. At present, the company has ternary polymer lithium battery technology and iron phosphate lithium battery technology, the main products cover soft package battery cell, square shell cell, battery management system, etc. The company plans to invest in the R&D and production base project of collective power battery in Qinhan New Town, Xixian New Area. The construction mainly includes power battery assembly and formation plant, battery pole piece production factory, power station, NMP warehouse, electrolyte storage and other supporting facilities. The project shall be invested and constructed in stages according to the principle of "overall planning and step-by-step implementation", and the annual output capacity of 16GWh power battery will be formed upon completion.

IV. Total Investment and Way of Cooperation

Total investment: RMB 15 billion Yuan; way of cooperation: enterprises' sole investment.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will form the annual production capacity of 16GWh.

Lantian Aviation (General Aviation) Industrial Park Project

II. Project Implementation Agency

Administrative Committee of Xi'an Yanliang National Aviation Hi-Tech Industrial Base

III. Project Description

The park will be guided by the integrated development pattern of aviation features, advanced industries, cultural and recreational activities, exhibition events, comprehensive community and other functions, forming a spatial layout of "one core, five zones". "One core" refers to the general aviation airport as the core. The planned area is about 1100 mu, including airport runway, taxiway, parking apron, terminal building, hangar, weather station, hangar and aviation material support center. The planned runway size in the near future is 1800m 2B airfield area; in the long term, it is planned that the runway size is 2,600m and the 4E class airfield area will become the navigation hub airport of Guanzhong Plain urban agglomeration. The "five zones" refer to the construction of aviation characteristic service area, advanced manufacturing industry zone, aviation exhibition and competition area, cultural tourism health zone and production and living supporting area.

IV. Total Investment and Way of Cooperation

Total investment is about RMB 13.2 billion Yuan. Joint venture or cooperation is acceptable.

V. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, it will realize business income of RMB 50 million Yuan.

I. Project Name

Optoelectronics Industry Incubator Project

II. Project Implementation Agency

Administrative Committee of Tongchuan New Materials Industrial Park

III. Project Description

The project is planned to build optoelectronics industry incubator base, research development centers, lab and other related facilities.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 10 billion Yuan. Way of cooperation: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

The project will effectively promote realizing the cluster effect of photoelectron industry of the Park and realize the quick development of the industry.

I. Project Name

10,000 ton-Class Synthetic Liquid Solar Fuel (“Liquid Sunshine”) Demonstration Project in Yushen Area

II. Project Implementation Agency

Investment Promotion Bureau of Yushen Industrial Zone

III. Project Description

The application of electricity generated by renewable energy such as solar energy to electrolyze water for producing “green” hydrogen energy, and the conversion of carbon dioxide hydrogenation into liquid fuels such as “green” methanol is not only a fundamental way to solve the problem of carbon dioxide emission, but also a new energy storage technology for collecting and storing intermittently dispersed renewable energy such as solar energy. It is a “natural” process to realize the synthesis of green energy by artificial light.

IV. Total Investment and Way of Cooperation

Total investment of the project is estimated to be RMB 800 million Yuan. Way of cooperation: sole investment.

V. Anticipation of Market and Analysis of Investment Return

With the further reduction of the cost of renewable energy power generation and hydrogen production by electrolysis of water, the production cost of green hydrogen energy and solar fuel will be greatly reduced. Through large-scale carbon dioxide capture and resource utilization, it can promote the large-scale development of renewable energy. The “liquefying sunshine” project is expected to fundamentally improve China’s ecological environment and helping to solve global carbon emissions and climate change issues.

I. Project Name

Super Generation III Low Light Level Image Intensifier Packaging Production Line Project in Shangzhou District

II. Project Implementation Agency

Shaanxi Chongde Shangtong Photoelectricity Technology Co., Ltd.

III. Project Description

In Hongguang Village Industrial Poverty Alleviation Demonstration Park of Shahezi Town in Shangzhou District, 3,750 m² workshops are rent and reconstructed, including reconstruction of 300 m² of office, 100 m² of conference room, 70 m² of R & D room, 200 m² of exhibition room, 600 m² of cleaning workshop, 200 m² of cleaning workshop, 100 m² of coating workshop and 2180 m² of other areas. 3 sets of every equipments listed below including image intensifier testing equipment, limit resolution detection equipment, image intensifier performance testing equipment and intensifier commissioning equipment have been purchased and installed. Packaging production line of super III generation of low light level image intensifier has been built relying on existing military orders. After purchasing bare tube of low light level image intensifier from Russia and introducing technology and packaging equipment, low light level image intensifier can be packed.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 120 million Yuan, of which, the fixed assets investment is RMB 100 million Yuan. Way of cooperation: joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

China's low light level night vision technology started late, and there is still a big gap with the advanced level of foreign countries. Therefore, we need to vigorously strengthen the development of image intensifier technology and gradually narrow the gap with the advanced level of foreign countries. After the project is completed, it is estimated that annual production value of RMB 115 million Yuan and profit and tax of RMB 38 million Yuan will be realized.

Infrastructure

I. Project Name

Liyu Mountain Culture and Tourism Nursing Project

II. Project Implementation Agency

Investment Promotion Bureau of Ankang High-Tech Industries Development Zone

III. Project Description

The project is located in the area to the south of Yuehe River in Ankang Hi-tech Industrial Development Zone, with a planned land area of 1292 mu, containing geothermal hot spring resources. It is planned to lay out functional areas such as cultural tourism exhibition area, ecological wisdom health zone, hot spring hydrophilic resort, high-end ecological livable area, resettlement area and other functional areas, aiming at creating a first-class cultural tourism and healthy rehabilitation destination in China.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 6000 million Yuan. Way of cooperation: joint venture or sole investment.

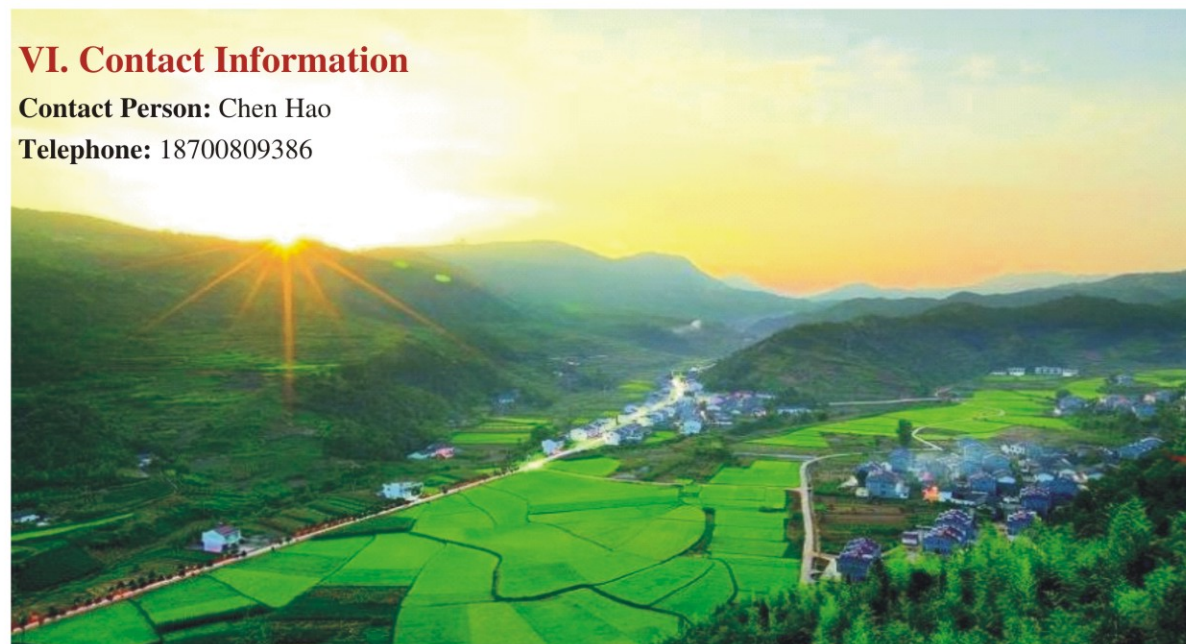

V. Anticipation of Market and Analysis of Investment Return

After the project is completed, the annual tourist reception capacity is 20 million. It is estimated that it can promote the comprehensive tourism income of RMB one billion Yuan, annual tax contribution RMB 40 million Yuan, provide job for over 1000 persons.

VI. Contact Information

Contact Person: Chen Hao

Telephone: 18700809386

I. Project Name

The 2nd Stage of Shantytown Reconstruction Project of Lintong Railway Station

II. Project Implementation Agency

Lintong Urban Construction (Group) Co., Ltd of Xi'an

III. Project Description

This project belongs to shantytown reconstruction project on collective lands, which is the extension and expansion of shantytown reconstruction Phase I project of Lintong Railway Station, and is a key project of city and district listed by Housing and Urban-Rural Development Bank loan planned to be used by Housing and Urban-Rural Development Bank in 2016. The Project is located in Xiazhu Village, Wuyue Street Office, Lintong District. It starts from the west boundary of Shantytown Reconstruction Project Phase I of Lintong Railway Station in the east, ends at Xitong Expressway in the west, starts from the south boundary of Xiazhu Village Xiazhu Village West Group in the south, and ends at the north boundary of Jinjia Group of Xiazhu Village of Xiaozhu Street Office in the north. The total land occupation area of the Project is about 3007mu, the planned land is about 2,492mu, and the planned net land is about 1500mu, among which, the resettlement area covers 178 mu, which can be used for development of 860 mu, and the administrative, medical, green and education parts of the government occupy 462 mu. The planned total construction area of residence, commerce, education, sports and sports, medical treatment and health care is about 2.46 million square meters and the total investment is about 7.8 billion yuan. The demolition and resettlement work of the project has been started in an all-round way, with 50% of the resettlement area constructed within the year, and the demolition work has been fully completed.

IV. Total Investment and Way of Cooperation

Total investment: RMB 7.8 billion Yuan. Way of cooperation: cooperation.

V. Anticipation of Market and Analysis of Investment Return

The project is located at the intersection of the old city, new area and Weibei Industrial Park, which can be regarded as the core of the center. The advantages of the location bring huge appreciation space. Qinhan Avenue runs through the project, which is the main traffic artery connecting Xi'an to Terracotta Warriors, and can form a good competitive advantage in the market. The service extension area of the international tourism city and the large closed-loop tourism supporting facilities in the whole region can solve the problem of employment and improve people's livelihood. It improves the supporting facilities of the north of Lintong City and Lintong District which are not suitable for the high-speed development and are backward.

I. Project Name

Business Aviation Industrial Project

II. Project Implementation Agency

Xi'an Aviation Base

III. Project Description

Relying on the talent gathering advantage of Xi'an aerospace industry, it, under the background of commercialization in many fields of China's aerospace industry, attracts upstream and downstream companies of commercial aerospace industry to settle in, engaging in R & D and manufacturing of engaged fields including rockets, satellites, navigation, measurement & control and supporting component systems.

Commercial aerospace industry is an inevitable trend of the future development of aerospace industry and has a good prospect for development. The project scale shall be subject to the final feasibility study demonstration and planning approval.

IV. Total Investment and Way of Cooperation

The way of cooperation adopts the enterprise as the body.

The investment of research development project is not unrestricted. The aviation base will assist to complete office selection, matched capital, capital support and resource connection.

The investment for manufacturing projects shall not be less than RMB 300 million Yuan and the investment per mu shall not be less than RMB 10 million Yuan.

V. Contact Information

I. Project Name

Sci-Tech Industry Incubator Park Project of
Shangluo High-Tech Industries Development Zone

II. Project Implementation Agency

Investment Promotion Bureau of Shangluo High-Tech Industries Development Zone

III. Project Description

Covering an area of 56 mu and a building area of 38,000m² center, a community factory, logistics storage, manufacturing and processing will be built, focusing on building “nine platforms and one center”, namely, academic exchange platform, intermediate test platform, technology detection platform, achievement display platform, product trading platform, patent application platform, seed fund platform, investment and financing platform, marketing promotion platform and incubation business service center.

IV. Total Investment and Way of Cooperation

Total investment of the project will be RMB 1.5 billion Yuan. Way of cooperation: sole investment, joint venture or others.

V. Anticipation of Market and Analysis of Investment Return

The park takes small and medium-sized scientific and technological enterprises as the service objects, provides shared facilities in R & D, pilot production, business site and office, and provides policy, management, law, finance, financing, market promotion and training services, so as to reduce the venture risks and entrepreneurship costs of enterprises, improve the survival rate and success rate of enterprises, and cultivate more successful science and technology enterprises and entrepreneurs for our city. Its market prospect is promising. After the completion of the project, the annual comprehensive income of 400 million Yuan and the profit and tax of 100 million Yuan will be realized.

I. Project Name

Construction Project of Taibai County West
Mancheng Medicine and Nursing Complex

II. Project Implementation Agency

Bureau of Human Resources and Social Security of Taibai County

III. Project Description

The planned land area is 120 mu, the floor area of the building is 40,000 square meters, and the number of designed beds is 3000. The convalescent and rehabilitation centers, nursing apartments and convalescent hospitals shall be built mainly by combining medical care and health care, as well as relevant infrastructure and service facilities with complete functions.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 650 million Yuan. Joint venture, cooperation or sole investment is acceptable.

V. Anticipation of Market and Analysis of Investment Return

Through the construction of medical and maintenance complex, the unique health industry such as Taibai medical and nursing tourism will be developed by utilizing the unique natural resources and medical and nursing resources of Taibai, which is beneficial to drive the development of the local tertiary industry, broaden the channels for increasing residents' income, promote the development of regional economy, enrich tourism, and make the multi-level social security system more complete and the health system more perfect, thus to produce inestimable economic and social benefits. The project has a bright market prospect. Implementation of the project will effectively alleviate the social problems of aging population and meet the needs of the general public and social development. The payback period of the project investment is 5 years.

VI. Contact Information

Contact Person: Ma Hongrong

Contact Person: Xu Gaofeng

Telephone: 13110323889

I. Project Name

Shitou River Comprehensive Treatment Project of Taibai County

II. Project Implementation Agency

Bureau of Water Resources of Taibai County

III. Project Description

It is planned to harness 11 dangerous sections of Shitouhe River with a length of 29km, of which the regulation length of the main stream is 27km, and the regulation length of 5 tributaries (Jili Valley, Shancha River, Houhe River, Lupinggou and Shagou Gorge) is 13.8km, covering 13 villages of Taochuan Town and Yingge Town. In which, the regulation length of Taochuan Town is 24.3km, involving 7 dangerous sections, and the regulation length of Yingge Town is 16.5km, involving 4 dangerous sections.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 450 million Yuan. PPP is adopted.

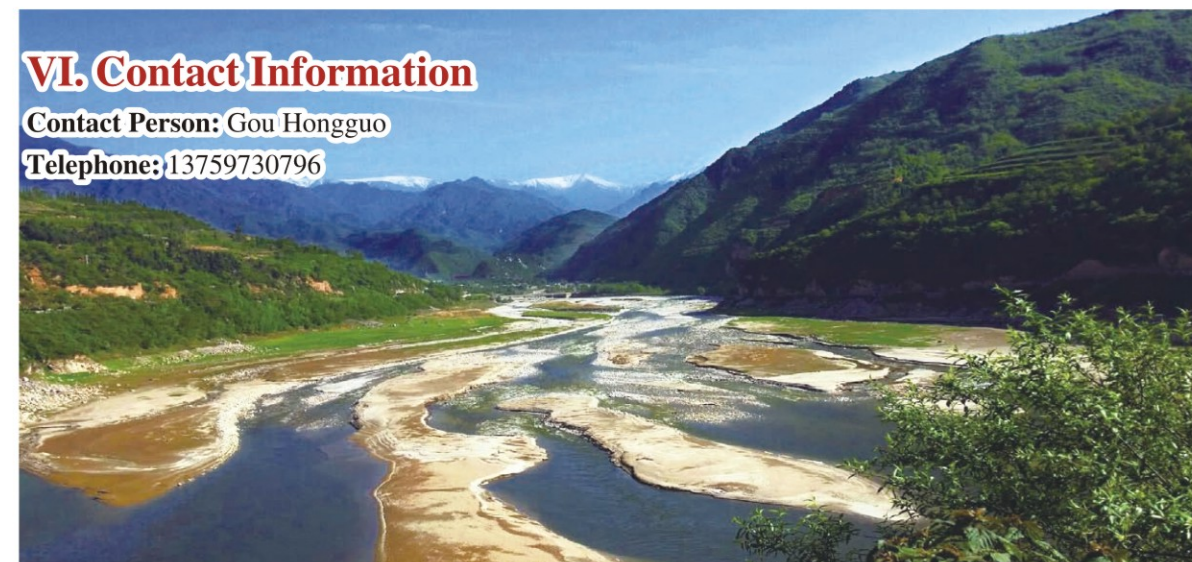

V. Anticipation of Market and Analysis of Investment Return

The comprehensive treatment of Shitou River is not only a livelihood project to ensure the people's production and life, but also an important measure to protect and improve the ecological environment of Shitou River. It can protect the safety of 12,000 people's lives and property in 13 villages of Yingge Town and Taochuan Town, and protect the irrigation needs of more than 20,000 mu of farmland along the river.

II. Project Implementation Agency

Bureau of Civil Affairs of Pingli County

III. Project Description

Total land using area is 37923.74m², the planned construction area is 66628.09 m² (the construction area above the ground is 44923.52 m² and the construction area under the ground is 21704.57 m²) and Outdoor area is 22375.01 m².

IV. Total Investment and Way of Cooperation

Total investment of the project is planned to be RMB 320 million Yuan. Capital will be obtained through investment promotion and local finance. Way of cooperation: cooperation, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

The elderly apartment construction project is a social public welfare project. The estimated operation period is 48 years. The balance of profit and loss can be ensured if the utilization rate of production capacity is 55%. The economic benefit is relatively weak. However, the social benefits are obvious, which can lighten the burden of the government and family, and contribute to social stability, and truly enable the elderly, a vulnerable group, the access to "supporting, learning, enjoying, working and having medical care for the elderly". The project is labor-intensive and will provide 80 to 100 jobs after completion and operation to solve the employment and re-employment problems of laid-off workers and groups with difficulties in employment.

I. Project Name

Stem Cell Preparation Industrial Park Project

II. Project Implementation Agency

Administrative Committee of Xianyang High-Tech Industries and Development Zone

III. Project Description

Having a planned area of 800 mu, the project focuses on the new technology development of stem cell therapy, cell therapy production process research and development, virus carrier production process research and development, GMP production of virus carrier, CGMP production of cell therapy, cell treatment technique development and preparation platform integrating in cell bank transformation.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 20 billion Yuan. Cooperation or sole investment is acceptable.

V. Anticipation of Market and Analysis of Investment Return

This project industry has distinct promotion and it can gather more high-end medical equipment and its stem cell production enterprise. The quick development of this industrial park will form a complete stem cell industry chain.

VI. Contact Information

Contact Person: Wang Ning

Telephone: 13571006390

I. Project Name

Construction Project of Dali County China Nano Valley

II. Project Implementation Agency

Administrative Committee of Dali County Economic & Technological Development Zone

III. Project Description

The planned area of the project is about 100 hectares. It is planned to build "Western National Academy of Nanotechnology Innovation", international nano engineering application R & D platform and 5 nano-material academician workstations. Through three-phase construction, large-scale production of leading industries, coordinated promotion of key application industries and cluster development of extended industrial will be realized.

IV. Total Investment and Way of Cooperation

The total estimated investment of the project is about 20 billion Yuan, of which about 5 billion Yuan is planned for the first phase project, focusing on the large-scale production of various metal nano powders and industrialized production by using the mature nano application technology at present; 5 billion Yuan is planned to be invested in the second phase to realize the industrialized production of the key application fields of nano materials; and 10 billion Yuan is planned to be invested in the third phase to further extend the nano application fields and realize the cluster development of the extended industries. Way of cooperation: joint venture, sole investment, cooperation or project financing.

V. Anticipation of Market and Analysis of Investment Return

After the project is built completely, it is estimated that annual gross industrial output value will exceed RMB 15 billion Yuan, annual profit and tax will reach RMB 3.5 billion Yuan. The comprehensive rate of return on investment is about 17.5% and the investment recovery period is about 5.6 years.

I. Project Name

Silk Road (Xi'an) Qianhai Park

II. Project Implementation Agency

Administrative Committee of Xi'an High-Tech Industries Development Zone

III. Project Description

Silk Road (Xi'an) Qianhai Park Project is located in the core area of the Central Innovation Zone of Silk Road Science City, covering an area of 106 mu and building area of 320,000 square meters. There are 18 single buildings in total, containing 3 underground floors, 4 to 8 floors above the ground. The plot ratio is 1.9, and the total investment is about 2.5 billion Yuan. With advanced planning and first-class designs, the project aims to create a modern, intelligent and high-quality park with low plot ratio area integrating courtyard, overlapping and garden-style office space and high-end exhibition and boutique hotels. At the same time, the project is a major project to implement the instructions of General Secretary Xi Jinping, a typical example for Xi'an and Shenzhen to achieve high-quality development hand in hand, and the first sample of "Qianhai Mode" replicated in mainland China. Upon completion, Qianhai of Shenzhen will be responsible for policy and industry introduction, devoting itself to becoming an economy with a new height of openness, "based on bridgehead, working hand in hand with Qianhai, connecting with the international community and serving Silk Road".

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 2.5 billion Yuan. It is unrestricted.

V. Anticipation of Market and Analysis of Investment Return

The project is planned to gradually introduce 130 private equity investment institutions and 10 supply chain financial licensees, and the fund management scale in the future will reach more than RMB 60 billion Yuan. We will vigorously serve the real economy and promote hard the regional economic restructuring and industrial transformation and upgrading. We will build an economy with a new height of openness where Guanzhong Urban Agglomeration is connected with Guangdong-Hong Kong-Macao Greater Bay Area in terms of institutional rules and their resources are co-constructed and shared, and strive to build Silk Road financial innovation source and internationalized fund town and financial block.

I. Project Name

Smart Education Cartoon Industrial Park Project of Southern Shaanxi

II. Project Implementation Agency

Investment Promotion Bureau of Ankang High-Tech Industries Development Zone

III. Project Description

The planned land for the project is 270 mu, which is developed according to the mode of "animation industry + real estate". Among them, planned area of animation industrial park is 123 mu, including animation theme park, animation experience block, animation performing arts center, full-age wisdom education and other functional blocks, covering P creativity, animation production, vocational training, peripheral development and other cultural and creative industry contents, to create a gathering place of animation entertainment and international play school integrating animation production, education and training, leisure and entertainment, parent-child growth and characteristic commerce.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB one billion Yuan. Joint venture is adopted.

V. Anticipation of Market and Analysis of Investment Return

The project is planned to introduce 50-100 culture creative enterprises, realize annual production value of RMB 800 million Yuan and create job for 1000 persons.

I. Project Name

Carbon Fiber Composite Project

II. Project Implementation Agency

Administrative Committee of Tongchuan New Materials Industrial Park

III. Project Description

This project is planned to acquire 200 mu (1 mu = 666.6667 m²) of land for the construction of carbon fiber composite material production line project. It is mainly to produce inorganic high-performance fiber with carbon content over 90%, which can be widely used in aerospace, automotive lightweight, wind power, rail transit and other industries. It belongs to high-end composite materials.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 885 million Yuan. Way of cooperation: joint venture or sole investment.

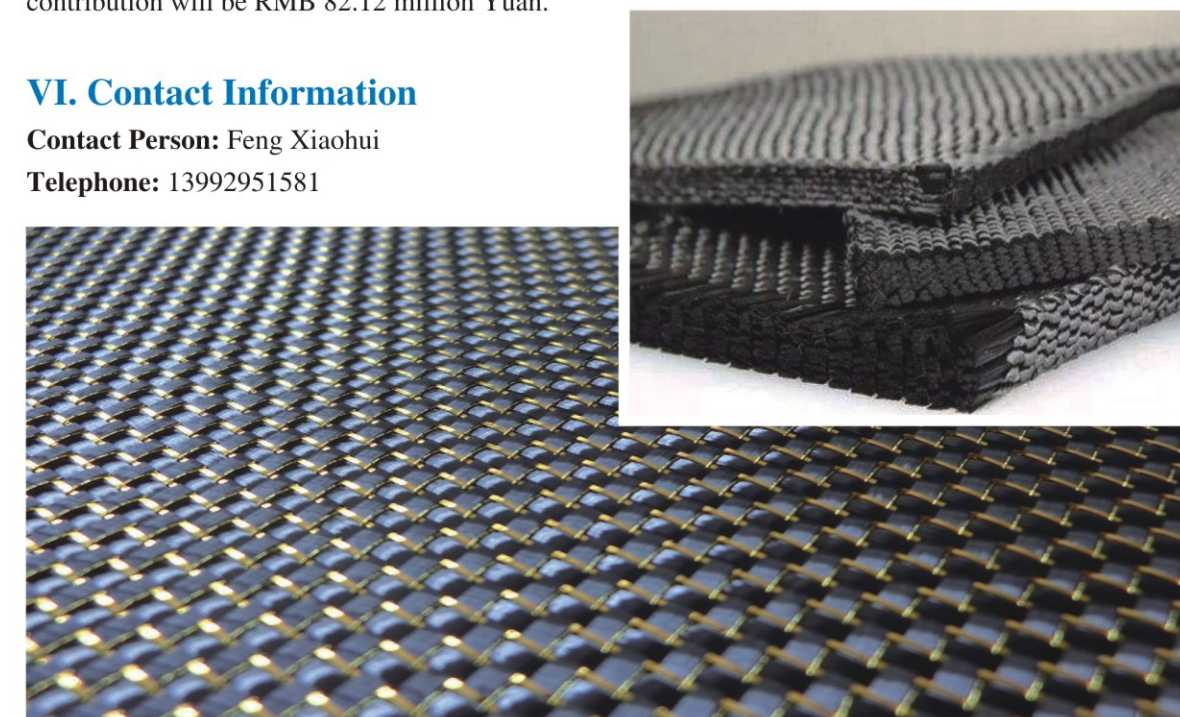

V. Anticipation of Market and Analysis of Investment Return

After the project is put into operation normally, annual average business income will be RMB 720 million Yuan, business tax and additive will be RMB 6.74 million Yuan and annual income tax contribution will be RMB 82.12 million Yuan.

VI. Contact Information

Construction Project of Scrapped Motor Vehicle Recovery and Disassembly Production Line

II. Project Implementation Agency

Daxing Scrapped Motor Vehicle Recovery and Disassembly Co., Ltd. Of Baihe County

III. Project Description

The Scrapped Motor Vehicle Recovery and Disassembly and renewable resources applied by the company is located at the Group I of Chuanping Community of Zhongchang Town. It has a planned investment of RMB 45 million Yuan and 16 mu of land has been requisitioned. It is planned to build 3000m² of disassembly workshop, 1500m² of office building, finished products warehouse, 4500m² of interim vehicle area, purchase fine disassembly equipment, freon extraction equipment, oil and water separating equipments, cutting machines, faggoting press, forklift trucks, traction equipment, weighing equipment, hoisting equipment and etc. It will form the production capacity of 2100 various scrapped motor vehicles (including 600 passenger vehicles), meanwhile, it will recover the scrapped steel, scrapped nonferrous metal, waste plastics, tyre, rubber products, Freon and waste oil and etc after the disassembling of scrapped motor vehicles.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 45 million Yuan and it will be obtained through investment promotion. Joint venture is adopted.

V. Anticipation of Market and Analysis of Investment Return

The investment recovery period is 3 years. After the project is completed and put into operation, it can provide job for over 60 persons. It can realize economic benefits of RMB 20 million Yuan directly or indirectly.

I. Project Name

Industrial Pollution Treatment and High Quality Development along the Bank of Weihe River in Yellow River Valley

II. Project Implementation Agency

Administrative Committee of Weinan Economic & Technological Development Zone

III. Project Description

The project covers an area of 3,700 mu, with an investment of about 1 billion Yuan in Phase I, mainly focusing on the environmental improvement and infrastructure construction of the sections from Weifu Bridge to Shawang Bridge, the north embankment of Weihe River and both sides of Xiangshan Avenue in the Economic Development Zone, speeding up the urbanization construction suitable for living and tourism, and improving the regional investment environment.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 5 billion Yuan. Investment promotion is adopted.

V. Anticipation of Market and Analysis of Investment Return

The project may effectively improve the infrastructure in the economic technologies development zone; further improve the ecological environment, human environment. It is conducive to promoting the construction of city industrial base.

VI. Contact Information

Contact Person: Du Xiaolong
Telephone: 15667339933

I. Project Name

Construction Project of Liufengguan Recycling Economic Park

II. Project Implementation Agency

Administrative Committee of Liufengguan Recycling Economic Park

III. Project Description

The park is planned to have an area of 8 square kilometers. The project is located in the north of Shuangshipu Town, Feng County, with a straight-line distance of about 3.6 kilometers from the county town. At present, there are 28 enterprises of various types and 6 scale enterprise. Focus on promoting the transformation and upgrading of advantage leading industries with lead and zinc mining and smelting, and vigorously cultivate three emerging industries, namely, new materials, resource recycling and equipment accessories processing.

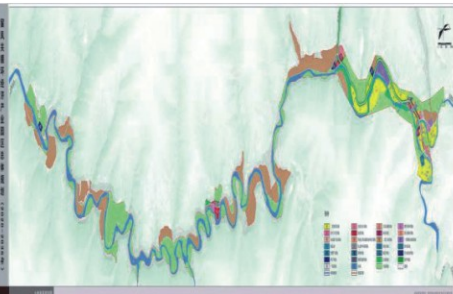

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 5 billion Yuan. Way of cooperation: cooperation, joint venture or joint venture.

V. Anticipation of Market and Analysis of Investment Return

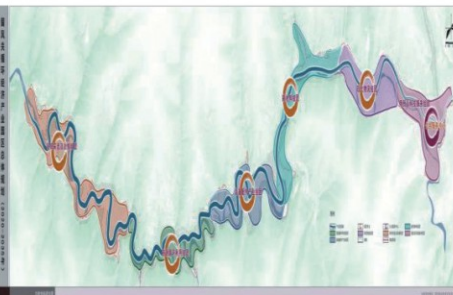

In 2020 the industrial production value of the park realized RMB 4.56 billion Yuan, the average benefit per mu was RMB 3.37 million Yuan.

I. Project Name

Thermal Power Industrial Park Project of Shangluo High-Tech Industries Development Zone

II. Project Implementation Agency

Investment Promotion Bureau of Shangluo High-Tech Industries Development Zone

III. Project Description

Utilize the available resources such as fly ash and steam generated by Shangluo Power Plant, focus on building materials recycling enterprises of Sany Heavy Industry, Shangluo Yucheng, Meiheng Innovation, etc., expand and build extended and supplementary chain projects such as green building material processing, soybean food processing, etc., and expand the driving effect of the power plant.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 1.5 billion Yuan. Way of cooperation: sole investment, joint venture or others.

V. Anticipation of Market and Analysis of Investment Return

The Phase I of Shangluo Power Plant has been completed, with annual power generation of 6.6 billion kilowatt-hours and reserve heat and gas supply outlets. This project can make full use of the fly ash and desulfurized gypsum produced by the power plant to produce new wall materials such as aerated concrete blocks and boards, and realize the comprehensive utilization of coal ash and other solid waste resources; it can also utilize the waste heat of the power plant for bean products production, which not only reduces the cost of the enterprise, but also increases the income of the power plant to achieve a win-win situation. After the project is completed, annual comprehensive income of RMB 600 million Yuan and profit and tax of RMB 150 million Yuan will be realized.

I. Project Name

Urban Garbage Harmless Treatment
Project of Suide City

II. Project Implementation Agency

Suide County Investment Promotion Center

III. Project Description

With the acceleration of urbanization, the original domestic landfill can no longer meet the demand. This project fully combines the actual situation of Suide County, adopts the mechanical grate furnace incineration power generation technology to incinerate the garbage, or the pyrolysis power generation, so that the waste can be degraded. This project has strict environmental protection indicators, applicable and beautiful buildings, stable and reliable equipment, safe and standard operation, and advanced scientific management, which is in line with the sustainable development of domestic waste treatment, and can realize the reduction, harmlessness and recycling of urban domestic waste, and improve the urban environment.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 150 million Yuan. Way of Cooperation: sole investment or joint venture.

V. Anticipation of Market and Analysis of Investment Return

The profit rate of total investment of the project is 8.05%, a little higher than that of average profit rate. The project has some profitability.

Gangue Comprehensive Utilization
Project of Shanyang County

II. Project Implementation Agency

Shanyang County Investment Promotion Bureau

III. Project Description

Relying on vanadium, magnesium and silicon gangue resources and covering an area of 300 mu, it is planned to build the new energy-saving environmental protection materials production lines of microcrystalline glass, foam glass, silicate brick, furnace cinder brick, cement material and foam material. At present, the Study Feasibility Report has been prepared.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB one billion Yuan. Way of cooperation: sole investment or others.

V. Anticipation of Market and Analysis of Investment Return

Shangluo City now has more than 130 tailings ponds with a cumulative accumulation volume of nearly 125 million tons, accounting for 41.7% of the whole province and 1% of the whole country. It is preliminarily estimated that it has an industrial development value of 100 billion Yuan. The National Development and Reform Commission has approved Shangluo City to establish a national demonstration base for comprehensive utilization of paragenetic (associated) mineral resources. It has formed valuable components recovery from tailings (associated minerals) and an industrial structure dominated by tailings sintered bricks, baking-free bricks, concrete aggregates, machine-made sand, aerated blocks, thermal insulation wall materials, dry-mixed mortar, putty, cushion blocks and man-made decorative boards, which provides a good industrial foundation for the production of energy-saving and environment-friendly new building materials by tailings. After the project is completed, annual sales income of RMB 800 million Yuan and profit and tax of RMB 220 million Yuan will be realized.

Green Assembled Building Industry Demonstration Base Project of the High -Tech Industries Development Zone

II. Project Implementation Agency

Investment Promotion Bureau of Shangluo High-Tech Industries Development Zone

III. Project Description

Having a covered area of 100 mu, it is planned to build a new green series plate production line, special structure assembly production line, assembled internal and external board production line, meanwhile, it is planned to build production workshops, assembled building, key materials lab, pilot workshop, spare parts, warehousing, logistics and sampling room.

IV. Total Investment and Way of Cooperation

Total investment of the project is RMB 700 million Yuan. Way of cooperation: sole investment, joint venture or others.

V. Anticipation of Market and Analysis of Investment Return

Assembled buildings adopt standardized design, factory production, assembly construction, information management and intelligent application. They are representative of modern industrialized production mode, a significant change in construction mode, an important measure to promote supply-side structural reform and new urbanization development, which is beneficial to saving resources and energy, reducing construction pollution, improving labor production efficiency and quality safety level, promoting deep integration of construction industry and information industrialization, cultivating new industry and new driving force, promoting resolving excess capacity. The market prospect is very promising. After the project is completed, it will realize sales income of RMB 400 million Yuan and profit and tax of RMB 100 million Yuan.
