14. 40, 000t/y Ultra-High Molecular Weight Polyethylene (UHMWPE)	14
15. 20, 000t/y Polyvinyl Alcohol Production Project	15
16. Polybutylene-1 Project with Annual Output of 30, 000 tons	16

Advanced Manufacturing Sector

17. Intelligent Manufacturing Industry Project of Hanbin District	17
---	----

18. Intelligent Manufacturing and Development Base Project of Key Components in Shiquan County	18
19. High-performance Precision Titanium and Titanium Alloy Foil Production Line Project	19
20. Copper Alloy New Material Research Development and Manufacturing Project	20
21. Standard Workshop Project of Equipment Manufacturing Industrial Park in Hancheng Economic Technological Development Zone	21
22. Large-size Motors Overhaul Project	22
23. Modern Agricultural Machinery Equipment Manufacturing Project of Xixiang County	23
24. Aviation Industry Research Development and Manufacturing Center Project	24
25. Supporting Project for Auto Manufacturing in Shangnan County	25
26. 8 Inches High Performance Characteristic Process Semiconductor Chip Production Line	26
27. The 1 st Stage of Yulin Hydrogen Energy Industrial Base (Hydrogen Energy Equipment Manufacturing) Project	27
28. Ten Thousand Tons of Magnesium-Lithium Alloy and Magnesium Alloy Manufacturing Project of Bomei Kechuang Company	28
29. Daily-Use Life Porcelain Manufacturing Project	29
30. New Energy Auto Key Components Manufacturing Project of Huazhou District, Weinan City	30
31. Assembly Modular House Production Project of Dali County	31
32. Renewable Energy Equipment Manufacturing Base Project of Mingyang Group	32
33. Polarizing Reflection-type Brightness Enhancement Composite Membrane Project	33

34. New-type Environmental Protection Waterproof Building Materials Production Project of Zichang City	34
35. Huangling County New-type Wall Material Production Project	35
36. 30, 000 t/y Mutli-layer Coextruded Polyolefin Shrink Film Project	36
37. High-purity Micro Nano Aluminum-based New Material Project	37

Cultural Tourism Sector

38. Laolinchang Forest Health Care Town Project of Xunyangba Town, Ningshan County	38
39. Sanliya-Pipa Island Ecological Tourism Development Project in Pingli County	39
40. Taibai Mountain Indoor Ski Resorts Project	40
41. Linyou Health Care Comprehensive Development Project	41
42. Development Project of Xiangshan Natural Scenic Area	42
43. Jingong Mountain International Holiday Village Project	43
44. “Yunshang Caoba” Scenic Area Project	44
45. Qingshui Town Miaoxiang Art Town Project	45
46. Chuanzihe Village Rural Tourism Development Project	46
47. Zhaojin Revolutionary Education Experiencing Base Project	47
48. Tianliu Mountain Forest Park Operation Project	48
49. Construction Project of Agriculture Culture Tourism Sightseeing Holiday Area of Dali Shayuan	49
50. Shuncheng Lane (Anyuan Gate- Shangwu Gate)Project	50
51. Village Rejuvenation Education and Training Base Project of Taohua Valley	51
52. Development Project of Yongshou Culture Tourism Health Care Complex	52
53. Changanli Hotspring Culture and Tourism Complex Project	53

54. Taibai Mountain Leisure Ecological Park Project in Zhidan County	54
55. Xiangsichuan Leisure Health Care Tourism Spot Development Project	55
56. SCO National Culture Exposition Park and Russian Folk-Custom Street Project	56
57. Yangling Health Care Town Project	57
58. Construction Project of Duanzhai Village Health Care Tourism and Culture Holiday Area in Fugu County	58
59. Silkworm Rural Complex Development Project of Wubu County	59

Strategic Emerging Industries Sector

60. Smart Toy Manufacturing Industrial Park of Hengkou Demonstration Zone	60
61. Artificial Intelligence Industrial Park Project of Hanbin District	61
62. Forest Musk Deer Industry Development Project	62
63. Graphene Complex Functional Fabrics Production Project	63
64. Advantageous and Characteristic Resource Comprehensive Development and Recycling Project of Eucommia in Lveyang County	64
65. The 1 st Stage of Hanzhong Nuclear Medicine Intelligent Health Sci-Tech Park Project	65
66. Construction Project of Qinling General Aviation Industrial Park	66
67. Big Health Industrial Park Project	67
68. Monocrystal Furnace Equipment Manufacturing Project	68
69. Construction Project of Polybutylene Terephthalate (PBT) Production Line	69
70. Gold Refining Project of Tongguan County	70
71. Civil Aircraft Production Supporting Park Project	71
72. Haizhou Oral Cavity Medical Apparatus Manufacturing Project	72
73. 600, 000 m ³ /year High-end Continuous Flatting Board Production Line Project	73

74. Construction Project of Xunyi Traditional Chinese Medicine Health Industrial Park Plant Extracting Park	74
75. High-end Medical Apparatus Industrial Base Project of Baota District	75
76. Cold-chain Logistics Center Construction Project of Yichuan County	76
77. Jingbian “Intelligent General Aviation Incubator Center” Project	77

Modern Agriculture Sector

78. Turnjube Series Products Deep Processing Industrial Park Project of Xunyang City	78
79. Research and Development Project of Pawpaw Series Products of Baihe County	79
80. Potato Industrial Park Project of Longxian County	80
81. Qishan County Food Industry “Central Kitchen” Project	81
82. Agricultural Products Processing Park	82
83. Golden Fungus Breeding and Cultivating Project	83
84. Whole Industrial Chain Project of Tea Industry of Xixiang County	84
85. Development Project of Gastrodia Extracts Product of Lveyang County ...	85
86. Tongchuan Green Food Industrial Park Project	86
87. Jifu Food Industrial Park Project	87
88. Chinese Medicinal Materials Industrial Park Construction Project	88
89. Construction Project of Fruit and Vegetable Deep Processing and Cold Chain Marketing of “Direct Clean Vegetable”	89
90. Bailuyuan Ecological Restaurant Project	90
91. China Xi’an International Agricultural Products Exchange Center Project	91
92. Fine and Deep Processing Project of Buckwheat	92
93. Livestock Manure Resource Utilization and Ecological Organic Fertilizer Project	93

94. The First, Second and Third Industry Convergence Project of Luochuan County Apple Industry	94
95. 500 tons/ Year Freeze-dried Food Construction Project	95
96. Potato Industry Innovation Complex Project	96
97. Yangling Agriculture Intelligent Equipment Industrial Park Project	97
98. Wild-vegetables Breeding Base and Wild Vegetables Keeping Fresh Processing Project in Northern Shaanxi	98
99. Complete Set Intelligent Equipment Project for Low Temperature Instant Extrac- ting of Chinese Medicinal Materials	99

Infrastructure Sector

100. Chuangzhi Valley Project	100
101. Comprehensive Grade III Class A Hospital Project	101
102. City Complex Construction Project	102
103. Construction Project of Eastern Education New City of Shangnan County	103
104. Medical and Nursing Integration - Medical Center for Old Men Construction Project	104
105. Zhaojin Health Care Industrial Project	105
106. Huayin City Luofu Innovation and Entrepreneurship Service Center	106
107. Tongguan County Shaanxi-Shanxi-Henan Center Hospital Construction Project	107
108. Ecological Remediation Project of Urban Section of Jinshuigou Valley in Hey- ang County	108
109. Wastewater Treatment Plant Project of Airport Scientific Innovation Park	109
110. City Business Complex Construction Project	110
111. Jingyang County Culture, Sports and Activity Center Project	111

112. Construction Project of Huanglong County Logistics Center	112
113. Yan' an New District Emergency Safety Culture Experiencing Town	113
114. Luochuan County Apple Industry Technological Innovation Demonstration Project	114

Commerce and Trade Logistics Sector

115. Construction Project of Hanbin District Smart Logistics Park	115
116. Construction Project of Xunyang City Intermodality Intelligent Logistics Park	116
117. National Backbone Cold Chain Logistics Base Project	117
118. Baoji Port Transit Warehouse Project of "One Belt and One Road"	118
119. Smart Agriculture Business City	119
120. Renxiangyuan E-commerce Center of Hantai District	120
121. Metal Products Processing and Trading Center Project	121
122. Construction Project of Shizhen Town Warehousing and Logistics Industrial Park Project in Zhashui County	122
123. Logistics and Scientific Innovation Park of "One Belt One Road"	123
124. Construction Project of Zhenzhichuang Service Center of Tongchuan New Material Industrial Park	124
125. Yintai District Business Complex Project of Tongchuan	125
126. Huayin International Comprehensive Cold-Chain Industrial Park	126
127. Northwest Fertilizer and Agricultural Material Distribution Place Construction Project	127
128. Aviation Cross-border E-commerce Headquarters Clusters	128
129. Cross-border E-commerce Industrial Park	129
130. Delburg Craft Beer Project	130
131. Grain and Oil Warehousing, Logistics and Production Construction Project	131

132. Construction Project of Fuxian County Comprehensive Logistics Park	132
133. Modern Logistics Industrial Park of Yan' an High-Tech Industries Development Zone	133
134. Yangling Outlets Shopping Park Project	134
135. SCO Agricultural Industrial Park Project	135

Energy Saving and Environmental Protection Sector

136. Hancheng City Vein Industrial Park Project	136
137. Green Solid Waste Economic Recycling Utilizing Project of Hancheng Economic Technological Development Zone	137
138. Nanocalcium Carbonate Production Project of Nanzheng District	138
139. New-type Material Recycling Industrial Park Project of Ningqiang County	139
140. Distributed Photovoltaic Generation Project of Weinan High-Tech Industries Development Zone	140
141. Building Garbage Resources Recovery and Utilizing Project	141
142. Construction Project of Energy Storage Base of Chengcheng Economic Technological Development Zone	142
143. The 3 rd Stage of Construction Project of Dongfang Yuhong	143
144. Renewable Resources Comprehensive Recycling Utilization Project	144
145. High Performance Lithium-ion Power Battery Production and Research Development Project	145
146. Urban Building Garbage Treatment and Resource Utilization Project in Baota District	146
147. Comprehensive Utilization of 100, 000 tons of Agricultural Waste (Stalk, Branches) and Biological Fuel Project	147
148. Graphene Waterborne Anticorrosive Coating Production Project of Zhidan County	148

I. Project Name***Downstream Fine Chemical Products Development
Project of Methanol*****II. Project Description**

The project, covering an area of 300 mu at Changqing Industrial Park of Fengxiang District, is planned to revitalize the land for the 2nd stage of Methanol project and Xuzhou Mining Industry Group and to produce various downstream organic compounds of methanol, including ethylene, propylene, butadiene and other low-carbon olefin products and ethylene glycol, acrylic ester, dimethyl ether and other products. It will build production and reaction workshop, raw material storage logistics area and office area.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 2 billion. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be CNY 2 billion and annual profit and tax CNY 300 million. It will provide jobs for over 500 persons. It will effectively promote the regional economic and social development.

V. Project Implementation Agency

Fengxiang District, Baoji City

VI. Contact Information

Contact Person: Wang Wei

Telephone: 0917-7521380

I. Project Name***Production Project of Making Light Olefins with Methanol*****II. Project Description**

The project is planned to be built at Changqing Industrial Park of Fengxiang District. It is planned to build light olefins, production lines involving ethylene, propylene and butadiene. It is mainly to build a production area, warehousing area, buildings for offices and scientific technology, wastewater treatment center.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY one billion. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual sales income will be CNY 800 million, and annual tax contribution will be CNY 50 million and it will create jobs for over 200 persons.

V. Project Implementation Agency

Fengxiang District Investment Promotion Bureau, Baoji

VI. Contact Information

Contact Person: Wang Wei

Telephone: 0917-7521380

I. Project Name***Photovoltaic PTE Basilemma Production Line Project*****II. Project Description**

The project is planned to mainly build: 1. one research center for Basilemma about 10 storeys, having a construction area of 40,000m²; 2. 4 production workshops of 4 storeys, having a construction area of 160000m²; 3. one talent apartment of 8 storeys, having a construction area of 16000 m², 4. one auxiliary room of 2000 m² for power workshop, wastewater treatment station; and 5. auxiliary works involving in power distribution, wastewater, road and green space, including road of 37000m² and green space of 15000 m².

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1.1 billion. Way of cooperation: joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is put into operation, it will create jobs for 100 persons. Annual business income will be CNY 809.6 million, annual average cost CNY 451.18 million, total average profit CNY 353.31 million, annual average business tax and additive CNY 5.11 million, annual average value-added tax contribution CNY 88.33 million and average net profit CNY 264.98 million.

V. Project Implementation Agency

Administrative Committee of Tongchuan New Material Industrial Park

VI. Contact Information

Contact Person: Zhang Mengfan

Telephone: 0919-3586017

I. Project Name***Hydrogen Fuel Cell Project with Annual Output of 10MKW*****II. Project Description**

It is to construct 100, 000KW hydrogen fuel cell production line and standardized plant, office, R&D building, test center, warehouse, etc., as well as common engineering and service facilities of water supply and drainage, power supply and distribution, fire protection and environmental protection.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 750 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

The project has obvious advantages in the heavy-duty transportation field, and will gradually bring the cost of fuel cell vehicles close to or even lower than that of pure electric vehicles, thus having huge market potential. After the project is completed, it is estimated that annual production value will be CNY 1. 1 billion and it can provide jobs for over 300 persons. Meanwhile, it will effectively save resources and promote quick development of industrial economy.

V. Project Implementation Agency

Administrative Committee of Shaanxi (Chengcheng) Economic Technological Development Zone

I. Project Name***Solar Photovoltaic Glass Production Project of Heyang County*****II. Project Description**

The project covers an area of 100mu, to build a glass melting furnace with a daily glass melting capacity of 750 tons, matching with four 1.7m tempering production lines

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 700 million. Way of cooperation: sole investment or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

Improve the city image and taste of the whole county.

V. Project Implementation Agency

Heyang County Economic Technological Development Zone

Contact Person: Li Bo

Telephone: 13335357271

Postal Code: 715300

I. Project Name***Macromolecule Nano-composite Membrane Project
of Heyang County*****II. Project Description**

Having a covered area of 100 mu, it is planned to build 5 million m² of Macromolecule Nano-composite Membrane Project. It is planned to build service projects involving production workshop, quality inspection workshop, assembly workshop, employee dormitory.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 500 million. Way of cooperation: sole investment or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

Improve the city image and taste of the whole county.

V. Project Implementation Agency

Heyang County Economic Technological Development Zone

VI. Contact Information

Contact Person: Li Bo

Telephone: 13335357271

Postal Code: 715300

I. Project Name***Hydrogen Energy Industrial Base Project*****II. Project Description**

It is planned to build upstream and downstream industrial production and research and development projects of hydrogen energy (including the development, production, operation and sales of hydrogen fuel cell, stack, battery control system, hydrogen fuel generator system, hydrogen storage system, hydrogen production system, hydrogen refueling station and other products), and build a complete hydrogen energy industry chain and a hydrogen energy industrial base according to the existing advantage factors of industrial agglomeration in Xi'an.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 3–5 billion (defined by projects). Joint venture or sole investment is acceptable.

IV. Anticipation of Market and Analysis of Investment Return

It is estimated that annual production value of CNY 10 billion and profit of CNY 1 billion will be realized.

V. Project Implementation Agency

Xi'an National Civil Aerospace Industrial Base

Postal Code: 710100

I. Project Name

**50, 000t/y Carbon Dioxide-based Degradable
Materials Project**

**II. Project Description**

The project is planned to reside at High-end Energy Source Chemical Industrial Park of Binzhou City. The construction period is 33 months, namely from April 2023 to December 2025. The project, having a covered area of 138 mu and total construction area of 74020m², is planned to build standard industrial workshops, standard warehouses, comprehensive building for office, employees' dormitory, dining-hall, power distribution room, janitor's room, environmental protection treatment station and other supporting facilities.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 850 million. Way of cooperation: sole investment.

IV. Anticipation of Market and Analysis of Investment Return

The project will have annual average income of CNY one billion, annual average profit of CNY 171.9918 million. The investment profit rate is 20.23%, internal rate of return of finance after tax is 15.18%. The investment recovery period (excluding the construction period) is 6.59 years.

V. Project Implementation Agency

Binzhou Investment Promotion Bureau

VI. Contact Information

Contact Person: Zheng Binli

Telephone: 029-34929777

I. Project Name

300, 000t/y *Formaldehyde Project Making from Methanol*

**II. Project Description**

Shaanxi Runzhong Clean Energy Co., Ltd may produce 600, 000 tons of methanol, which can provide a strong raw material support. Having a covered area of 100 mu, it is planned to build production workshops, office buildings, staff dormitory, road, green space and other facilities.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 350 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual sales income will be CNY 86 million. Meanwhile, it will increase 300 jobs for local persons

V. Project Implementation Agency

Changwu County Investment Promotion Bureau

VI. Contact Information

Contact Person: Han Xin

Telephone: 029-34204505

I. Project Name***Coal Gangue Comprehensive Utilization Project of Xunyi County*****II. Project Description**

It covers an area of 100mu, has built the production lines for annual treatment of 1 million tons of coal gangue raw materials, the production lines for production of building materials, adsorption materials and organic fertilizer, and has built the supporting infrastructure such as production workshop, storage area, workshop, warehouse, office and plant area greening, and has production equipment and environmental protection equipment purchased and installed.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 150 million. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will have huge enterprises' economic and social benefits, which can arrange jobs for over one hundred persons. It has huge significance on drawing Xunyi's local economy, arranging social employment, precision overcoming poverty, improving people's livelihood, reusing waste and bettering environmental protection.

V. Project Implementation Agency

Bureau of Industry and Information Technology of Xunyi County Xunyi County Investment Promotion Bureau

VI. Contact Information

Contact Person: Li Xinfeng

Telephone: 029-34423840 029-34420900

I. Project Name***Research and Development and Production Project
of Hydrogen Energy Fuel Battery of Baota District*****II. Project Description**

The project has a total land using area of 46976.81m² (conversion to 70.43 mu) and the comprehensive utilization rate of land is 100%. The project construction follows the principle of “reasonable and intensive use of land”, and carries out scientific design and reasonable layout in accordance with the production specifications and requirements of hydrogen fuel cell industry

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 544 million. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project meets its production target, annual business income will be CNY 221.87 million, total cost CNY 166.84 million, tax and additive CNY 2.42 million, total profit and tax CNY 65.04 million, net profit after tax CNY 41.27 million, profit rate of investment will be 38.15%. the whole investment recovery period is 5 years and it can provide jobs for 397 persons.

V. Project Implementation Agency

Baota District Economic Cooperation Bureau

VI. Contact Information

Contact Person: Fan Yongquan

Telephone: 13399117566

I. Project Name***Production Project of High-Voltage Wiring Harness
for New Energy Vehicles in Huangling County*****II. Project Description**

The project covers an area of 96mu with a total building area of 57600m². The manufacturing of high-voltage wire harness for new energy vehicles will be promoted step by step. After Phase I of the project is completed and put into production, 300, 000 sets of high-voltage wire harness products for new energy vehicles will be produced annually; After Phase II is completed, it can produce 200, 000 sets of high-voltage distribution boxes and 200, 000 pieces of maintenance switches.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1. 105 billion. Way of cooperation: sole investment or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project reaches the production capacity, the products will be rapidly applied to the new energy vehicles in the northwest region. In the early stage, single high-voltage wiring harness is mainly produced, and then the cable connection of the whole vehicle is added. It is estimated that annual average sales income will be CNY 600 million and profit after tax CNY 212 million. The investment recovery period is 5 years and it can provide jobs for 700 persons.

V. Project Implementation Agency

Huangling County Investment Promotion Center

VI. Contact Information

Contact Person: Liu Jun

Telephone: 0911-5212770

I. Project Name***Hydrogen Energy and Fuel Battery Automobile Scientific-Technological Park in Yanan High-Tech Industries Development Zone*****II. Project Description**

The project, having a covered area of 120 mu and total construction area of 168000, is mainly to build scientific research incubator, key lab, inspection service center, manufacturing base, brand marketing headquarters, spread and exhibition center.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 936 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed and meets its production target, it is estimated that annual average income will be about CNY 520 million (over CNY 200 million from innovation-type products, over CNY 30 million from advertising and exhibition service, comprehensive income from various sci-tech achievements of over CNY 50 million, brand marketing income of CNY 50 million, Inspection service income of CNY 50 million) and net profit will be CNY 128 million. It is estimated that the whole investment will be recovered within 7.3 years.

V. Project Implementation Agency

Administrative Committee of Yanan High-Tech Industries Development Zone

I. Project Name***Intelligent Manufacturing and Development Base
Project of Key Components in Shiquan County*****II. Project Description**

Relying on the existing foundation of the equipment manufacturing industry of Shiquan County, Shaanxi Aobang Forging Co., Ltd. has built an intelligent factory with 40 intelligent vertical machining centers, 50 sets of numerical control machining machines and special machine tools, and stable cooperation chain for precision machining of mechanical parts. It is an important part for improvement of automobile parts industry in Shiquan Economic Development Zone, and it needs talents with technology, market and operating ability for cooperation and operation together. The project covers an area of 12000 square meters. Focusing on light-weight key parts and components of heavy-duty truck axle, it has overall design of top-floor planning of intelligent factory, to construct 1 front axle precision processing production line and 2 precision processing production lines of steering knuckle, and build a complete industrial information system by using a batch of advanced and intelligent production equipment. The overall design of plant/workshop, the digital modeling of process flow and layout, and the workshop interconnection network architecture are completed and verified; it is to build industrial information fusion platform (IIFP), realize high-efficiency collaboration and integration of ERP, PLM, SCM, MES and other systems, make analysis and optimization of data, and gradually form a digital factory integration platform.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1.15 billion. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After application, this will be the first demonstration project integrating the full-process digital production of forging, heat treatment and machining of key automobile parts in China, so it will accelerate the technical innovation, industrial development and market demand of China's forging industry and intelligent equipment manufacturing industry, and also drive the growth mode transition of the enterprise from labor-intensive to capital-intensive and technology-intensive type, making contributions to building the demonstration industrial park and circular economy industry of high-end intelligent manufacturing in western China.

I. Project Name***High-performance Precision Titanium and Titanium Alloy Foil Production Line Project*****II. Project Description**

The project is planned to build standard steel structure plant of 8000m², including production workshops, raw material pre-blending workshops, polishing workshops, comprehensive office building, raw material warehouses and miscellaneous warehouses, it is planned to harden 400 meters of transmission road as well as other production road, it is planned to build underground corridor system, public engineering projects involving water supply, water drainage and power supply, heat, road, communication, lighting and etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 200 million. Way of cooperation: sole investment.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it can realize the annual processing of 400t titanium foil, with an annual output value of CNY 100 million. It is mainly engaged in the production, processing and sales of titanium alloy products, non-ferrous metals and ferrous metals. It aims at the domestic top level for the performance and production capacity of the products. The products are exported to all parts of the world through distributors.

I. Project Name***Copper Alloy New Material Research Development and Manufacturing Project*****II. Project Description**

The project is planned to be located in Fufeng Emerging Industrial Park, covering an area of 50mu. It includes raw material pretreatment area, production workshop, testing workshop, research center, etc. It is planned to build copper and series alloy material production line, medical copper alloy material production line, automobile copper material production line, etc. The products are used for 5G communication, semiconductor chip, intelligent terminal and equipment, high-end medical equipment, rail transit motor, automobile electronics, high-speed rail, aerospace and other industries.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 500 million. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it is estimated that annual production value will be over CNY 500 million, profit and tax CNY 20 million, promoting over 150 persons' employment.

I. Project Name***Standard Workshop Project of Equipment Manufacturing Industrial Park in Hancheng Economic Technological Development Zone*****II. Project Description**

The project, having a land-using area of 224.36 mu (149573.26m²) and total construction area of 105277.24m², is planned to build 12 standard workshops (newly-building 11 workshops and using 1 existing building), build one multi-functional workshop, one comprehensive service building, one building, one equipment building, one janitor's room; meanwhile, it is planned to build related infrastructure involving road, green space, water supply, wastewater, gas and 30000m² of photovoltaic generation system setting on workshop roof and 5MWp total installation capacity. The completion of this project may revitalize the surrounding economy, better the living environment, improve residents' living quality. It is easy for residents' work and trip, increasing land value of the surrounding area.

III. Total Investment and Way of Cooperation

Total investment of the project is estimated to be CNY 461.1554 million. It may be leased or sold.

IV. Anticipation of Market and Analysis of Investment Return

The profit rate of total investment is 5.80%, internal rate of return of finance is 8.84% (before income tax) and 6.52% (after income tax), higher than that of basic rate; the net present value of finance of investment is CNY 90.6034 million (before income tax) and CNY 15.6973 million (after income tax); the investment recovery period is 8.01 years (including the construction period) before income tax and 8.75 years (including the construction period) after income tax.

I. Project Name***Large-size Motors Overhaul Project*****II. Project Description**

The project focuses on the technical service of motors and generators and the solution of technical problems in the production of electrical equipment. The project plans to rent a single-storey standardized workshop of 5, 000 square meters, for disassembly and assembly workshop, cleaning workshop, winding and dipping paint drying workshop, etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 100 million and CNY 100 million will be obtained through investment. Way of cooperation: sole investment.

IV. Anticipation of Market and Analysis of Investment Return

The motor maintenance market size is expected to grow from US \$ 128. 03 billion in 2023 to US \$ 179. 32 billion in 2028, at a CAGR of 6. 97%. With the continuous development of industrial automation, the motor equipment is more and more widely used, so the motor maintenance market is increasingly important and the market demand is gradually increasing. The motor maintenance industry will continue to benefit from the development of industrial automation and the wide application of motor equipment, with an annual investment return of over 15%.

I. Project Name***Modern Agricultural Machinery Equipment Manufacturing Project of Xixiang County*****II. Project Description**

It is planned to arrange agricultural machinery and equipment manufacturing industry in the county circular economy industrial park, build agricultural facilities and equipment manufacturing area, agricultural machinery and equipment manufacturing area, etc. , and build R&D center, standardized workshop, talent apartment and public service center as a whole.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 500 million. Way of cooperation: joint venture, sole investment, cooperation or other.

IV. Anticipation of Market and Analysis of Investment Return

Through 30 years' development, equipment manufacturing has become the important pillar industry for economic development. The home market demand is huge, the industrial foundation is favorable and the development strength is strong. After the project is put into production, it is estimated that annual business income will be CNY 1.2 billion, profit and tax CNY 350 million. Meanwhile it will create jobs for over 5000 persons. And the whole investment will be recovered within 5-8 years.

I. Project Name***Aviation Industry Research Development and
Manufacturing Center Project*****II. Project Description**

The total construction area is about 110, 000 square meters. The building functions mainly include standardized workshop, enterprise office, and supporting housing, to build an ecological industrial park focusing on aviation supporting industry manufacturing and R&D office. The project is divided into three parts: aviation industry R&D and manufacturing center, park industry development supporting area and the improvement area of greening landscape belt on both sides of the road.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1.4 billion. Way of cooperation: sole investment, joint venture or cooperation.

V. Anticipation of Market and Analysis of Investment Return

After the project is completed and put into operation, annual average business income will be CNY 208.9765 million. Through calculation, total profit of the project will be CNY 955.35 million, annual average income tax CNY 13.2687 million and annual average net profit after tax CNY 39.8062 million.

I. Project Name**8 Inches High Performance Characteristic Process
Semiconductor Chip Production Line****II. Project Description**

This project plans to build an 8-inch high-performance semiconductor chip production line with featured process. The production line has a monthly production capacity of 50,000 pieces and a minimum process line width of 0.11μm. It mainly produces power devices and power integrated circuits. The products are defined as SGT/SJT/BCD of high reliability, automotive grade and industrial grade.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 3.172 billion, of which, the capital is CNY 2 billion and bank loan is CNY1.172 billion. CNY1.5 billion will be obtained through stock right cooperation.

IV. Anticipation of Market and Analysis of Investment Return

Through calculation, the internal rate of return is 13% before tax and 11.38% after tax. In calculating period of the project, average profit after tax will be CNY 269.84 million, the sales profit rate will be 15.76%, profit rate of total investment will be 8.05%. This project has higher profitability level. The static investment recovery period is 7.92 years after tax. When the discount rate is 8%, the dynamic investment recovery period is 10.61 years after tax.

I. Project Name***The 1st Stage of Yulin Hydrogen Energy Industrial Base
(Hydrogen Energy Equipment Manufacturing) Project*****II. Project Description**

The project will build the equipment production base of each industry chain of leading hydrogen energy equipment manufacturing in China, and the completed water electrolysis hydrogen production equipment can be used for the demand in the fields of military industry, ship, glass firing and precious metal welding; The completed production base of hydrogen storage equipment for vehicle-mounted high-pressure hydrogen storage bottle, carbon/glass fiber composite material and solid hydrogen storage material, and of hydrogen-fueled internal combustion engine and hydrogen-fueled generator system equipment, which can be used for the related equipment of hydrogen fuel cell vehicle, meeting the demand of Yulin and the surrounding provinces and cities.

III. Total Investment and Way of Cooperation

In the first stage of the project, the total investment is CNY 3037 million, the engineering cost CNY 2165.34 million, other expenditure CNY 452.0858 million (including land cost of CNY 240 million). Way of cooperation: cooperation, joint venture or other ways of cooperation.

IV. Anticipation of Market and Analysis of Investment Return

With the initial formation of hydrogenation station network, the hydrogen fuel cell industry is tending towards perfection, the cost of hydrogen fuel cell system decreases, the downstream applications increase, and the market potential is huge.

I. Project Name

Ten Thousand Tons of Magnesium-Lithium Alloy and Magnesium Alloy Manufacturing Project of Bomei Kechuang Company

**II. Project Description**

The project is implemented by Bomei Kechuang Ultra-Light Materials Co. , Ltd. , covering an area of 91mu. It is mainly engaged in the R&D and production of new magnesium-lithium alloy and magnesium alloy materials. The construction includes preparation , forging , heat treatment , extrusion , die-casting , machining and surface deep processing of magnesium-based alloy. The designed production capacity is 3 , 000 tons of magnesium-lithium alloy and 7 , 000 tons of high-performance magnesium alloy.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 600 million. Way of cooperation : joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed , annual production value will be CNY 1.8 billion and the average production value per mu will be CNY 19.78 million.

V. Project Implementation Agency

I. Project Name***High-purity Micro Nano Aluminum-based New Material Project*****II. Project Description**

The project aims at the middle and high-end market of high-purity aluminum oxide with nano-scale of more than 4N. The main products are high-purity pseudo-boehmite, high-purity catalyst carrier, high-purity aluminum oxide powder, etc., which are all new high-end chemical materials. The proposed construction includes the main product process unit of high-purity micro-nano aluminum-based new material, the corresponding supporting upstream and downstream process units, and other supporting auxiliary utilities and environmental protection works, etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 3 billion. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

The annual average growth rate of global high-purity alumina output exceeds 5%, and China's high-purity alumina output accounts for 60% of the global output, and China has become a major production country of high-purity alumina in the world. High-purity alumina series products are used in chemical industry, new energy, semiconductor, photoelectricity, artificial crystal, medicine, pesticide, food additive and other industries. The production line has mature technology, and the industry demand is increasing rapidly. After the project is completed, it is estimated that annual total average profit will be CNY 1.2 billion, annual average income tax CNY 300 million. It can create jobs for 600 persons and the social benefits is considerable.

I. Project Name***Gold Refining Project of Tongguan County*****II. Project Description**

The project is located in the industrial park, with an investment of CNY200 million to provide a material basis for gold jewelry processing. The raw materials are mainly waste and old gold recovered in the market, purchased mixed gold materials in mines or bank channels, which are recycled and reused. Gold will be refined by chloridizing and dissolving gold purification, so that the gold products will meet the quality standard of Shanghai Gold Exchange.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 300 million. Way of cooperation: sole investment.

IV. Anticipation of Market and Analysis of Investment Return

After the project is implemented, the investment return period will be 3 years, it can solve the shortcomings of refining processing in Tongguan gold industry chain, bring new technology for Tongguan gold refining, making gold products meet the quality standard of Shanghai Gold Exchange, improve the brand benefits of Tongguan gold quality and create greater economic benefits to Tongguan.

I. Project Name***Civil Aircraft Production Supporting Park Project*****II. Project Description**

Civil Aircraft Production Supporting Park has a covered area of 1164mu. The main construction contents: workshops for airplane assembly, warehouses for parts and finished products, workshops for airplane overhaul, the complete airplane painting, research and development, parking apron, stage guaranteeing area, buildings for flight test and delivery, spare parts center, supporting area of upstream and downstream civil aircraft.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1.5 billion. Way of cooperation: joint venture or sole investment.

IV. Anticipation of Market and Analysis of Investment Return

The project is planned to improve aircraft supporting industrial chain, extend industrial chain, form industry gathering, building the most excellent civil aviation industrial platform. After the project is completed, annual production value will be about CNY one billion, annual tax contribution of about CNY 80 million. It will create 200 job positions.

I. Project Name***Turnjube Series Products Deep Processing Industrial Park Project of Xunyang City*****II. Project Description**

Konjak has specific effects on reducing cholesterol, blood fat and blood sugar in the human body, losing weight, building and beautifying and the like, particularly suitable for diabetics to eat for a long time, and series products such as konjak slices, shreds, refined powder and the like are more popular in the market. Xunyang is a well-known selenium-rich area at home and a good base for developing selenium-rich green and pollution-free food. By 2025, the total planting area of konjak will exceed 150,000 mu, with advantages of abundant raw material and food processing, it can provide sufficient raw materials for the construction of konjak green nutritional food processing plant. The project is planned to cover an area of 20 mu, with a planned total building area of 28000 square meters. It is mainly to build a production line for deep processing of 50,000 tons of Guaizao products and make full use of the abundant raw materials of Guaizao in Xunyang to process Guanzao foods, such as drinks, wine, vinegar, juice and hangover solution, main products include capsules, jelly, tablet candy, oral liquid, tea, powder, beverage, soft candy, etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 200 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual production value is estimated to be CNY 150 million and the investment recovery period is 5 years. It can realize the development of whole industrial chain of turnjube of Xunyang. The project is planned to build the largest production, processing, research development and exchange center of turnjube.

I. Project Name***Logistics and Scientific Innovation Park of “One Belt One Road”*****II. Project Description**

The “Belt and Road Initiative” Logistics Science and Technology Park Project will cover an area of about 62.165 mu, with the building area about 178954.59m², including 110166.57m² of above-ground building area, which will be used for R&D office, supporting commercial and canopy; the underground building area will be about 68788.02m², which will be used for commercial sinking square, underground garage, civil air defense and equipment room as well as outdoor supporting roads, greening, square, pipe network and so on.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1.35 billion. The building capital is from building enterprise's own financing and bank loan, of which, the bank loan accounts for 70.9% of the total investment and self-financed capital accounts for 29.1%.

IV. Anticipation of Market and Analysis of Investment Return

The operating income of the project mainly includes rental income and self-operating income. Annual average business income of the project is about CNY 174.0633 million.

V. Project Implementation Agency

Xi'an Aviation Innovation Center Development Co., Ltd.

I. Project Name***Construction Project of Zhenzhichuang Service Center
of Tongchuan New Material Industrial Park*****II. Project Description**

The project has a land using area of 18127.30m², total construction area of 55275.96 m², of which, the building area above the ground is 40286.74m² and the building area under the ground is 14989.22m². there are 391 parking positions for motor vehicles and 1382 parking positions for non-motor vehicles.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 379 million. At present, the land bid invitation has been done and it is planned to be developed jointly.

IV. Anticipation of Market and Analysis of Investment Return

After the project is put into operation, annual average business income will be CNY 50 million and tax CNY 50 million. Land bid innovation has been completed and it will be developed jointly.

V. Project Implementation Agency

Tongchuan City Huayuan Investment Development Co. , Ltd.

I. Project Name***Yintai District Business Complex Project of Tongchuan*****II. Project Description**

Aiming at high-rise elevator apartments and large commercial complexes, the project is to build a landmark building in Yintai District, Tongchuan, it will be an real estate project integrating high-quality residential buildings, large commercial complexes and hotels at the intersection of Tongxing Road and Yan'an Road. The project is located in the central area of Yintai District, with convenient traffic, dense population as well as complete supporting facilities such as schools and hospitals, the advantages are obvious.

III. Total Investment and Way of Cooperation

Total investment of Yintai District Business Complex, Tongchuan is CNY 520 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

The completion of the project will provide convenient and high quality life for purchaser and improve existing life conditions. It is estimated that annual sales value will be CNY 270 million.

V. Project Implementation Agency

Mianyang City Huahui Real Estate Development Co. , Ltd.

VI. Contact Information

I. Project Name***Huayin International Comprehensive Cold-Chain Industrial Park*****II. Project Description**

The project will cover an area of about 300 mu with a building area of 252280 m² (completed in three stages), including e-commerce incubation center, cold chain logistics plant, pretreatment processing plant, cold chain logistics warehouse, cold chain distribution center, cold chain supporting room, public supporting room, standardized workshop, trade exhibition center, cold chain living supporting room, equipment room and supporting facilities such as water supply and drainage, fire fighting, road and hardening in the project area.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 1049 million. It is a cooperation project by the government and social capital.

IV. Anticipation of Market and Analysis of Investment Return

The implementation of the project will be conducive to building a first-class logistics park and international logistics service brand, solve the employment problem of the surplus labor force in the surrounding areas and increase the income of the local.

I. Project Name***Northwest Fertilizer and Agricultural Material
Distribution Place Construction Project*****II. Project Description**

The project, having a planned land-using area of 400000m² (conversion to 600 mu), is planned to build a northwest fertilizer and agricultural materials distribution place. It is mainly to build 10 tons of potash fertilizer warehouses (total volume of 800, 000 tons), 2 compound fertilizer workshops, one chemical fertilizer agricultural material research institute, one supporting room, purchase related equipment, build potash railway transportation line, potash belt line and other facilities involving water supply, power supply, heat supply, outdoor parking lot, road hardening and green spaces

III. Total Investment and Way of Cooperation

The project will invest CNY 1600 million, sources of funds: application for special bonds by local government and the self-raised funds by the construction unit.

IV. Anticipation of Market and Analysis of Investment Return

It will effectively maintain the stable price of fertilizer market in Northwest China, ensure the production and reduce the consumption, relieve the pressure of distribution and transportation, and promote the development of regional material storage and improvement of logistics system.

I. Project Name***Aviation Cross-border E-commerce Headquarters Clusters*****II. Project Description**

Relying on advantages of space base, transportation, policy and infrastructure and supporting facilities, the space base plans to provide a resource platform for enterprises which engage in cross-border e-commerce by building cross-border e-commerce headquarters cluster, and focus on providing cross-border trade comprehensive services for cross-border traders, and gradually form a cross-border e-commerce industry chain headquarters cluster integrating product resources, platform connecting, data services, office, warehousing support, logistics distribution, talent transmission, training and third-party operation services (helping traditional agriculture-related enterprises to explore international markets through the Internet) .

III. Total Investment and Way of Cooperation

The project will invest CNY 300 million at least, and the platforms or enterprise which have mature experience in operation and management in cross-border e-commerce are preferred to station or self-purchase land for construction.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed and meets its production target, annual production value will be over CNY 500 million.

I. Project Name***Cross-border E-commerce Industrial Park*****II. Project Description**

The project is located in Xi'an Chanba International Port Central Business District, Zhongtie Excellent City, China Merchants Group Silk Road Center, Chanba Free Trade Center and Foreign Affairs Building, with a planned area of 5 square kilometers. The project enjoys a superior geographical location and convenient transportation. It is close to Metro Lines 3 and 14, which provides a unique physical condition for the gathering and development of cross-border e-commerce enterprises. Taking digital innovation as the core concept, the Industrial Park is committed to building an intelligent and efficient e-commerce innovation platform. Relying on China-Europe Train Changan Cross-border E-commerce National Gathering Center, the Industrial Park will vigorously attract and cultivate the upstream and downstream enterprises of the cross-border e-commerce industry chain, such as cross-border e-commerce platforms, cross-border e-commerce sellers, cross-border e-commerce service providers and cross-border payment institutions.

III. Total Investment and Way of Cooperation

At present, the project has been put into operation and it is seeking cooperation with enterprises such as cross-border e-commerce, international trade, international logistics and cross-border live broadcasting

IV. Anticipation of Market and Analysis of Investment Return

Cross-border e-commerce, one of the leading industries, is cultivated and developed in Xi'an Chanba International Port, and the park has released supporting policies. After cross-border e-commerce and upstream and downstream enterprises station here, they will enjoy lucrative support policies, close business environment and efficient communication platform to help them further improve their competitiveness in overseas markets.

I. Project Name***Delburg Craft Beer Project*****II. Project Description**

The project, having a land-using area of one parcel about 100 mu and total construction about 40000m², is mainly to build the craft beer production line with annual production capacity of 100, 000 tons. It is planned to be built by two stages. In the first stage it has a covered area of 50 mu and total investment of CNY 150 million and it can produce 50, 000 tons of craft beer a year. In the second stage, it has a land-using area of 50mu and total investment of CNY 130 million, it can produce 50, 000 tons of craft beer a year.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 280 million.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed and meets its production target, annual sales income will be CNY 300 million, annual tax of over CNY 20 million. It will provide jobs for 100 persons. After the project is completed and meets its production target, annual sales income will be CNY 700 million and tax CNY 400 million and it will provide jobs for 200 persons.

V. Project Implementation Agency

Jinan Spring Beer Co. , Ltd.

Contact Person: Wang Jiqing

Telephone: 13906343288

I. Project Name***Grain and Oil Warehousing, Logistics and Production
Construction Project*****II. Project Description**

The project has a total covered area of 366666.69m² (conversion to 550 mu), total construction area of 488373.98m². It is mainly to build 240000m² of processing workshop, 200000m² of warehouse, 15000 m² of office room, 14400 m² of life facilities. Meanwhile it is planned to build platforms, parking lot, green space, road and other supporting facilities.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 3 billion. The total investment will be financed by the building enterprise itself.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual income of CNY 3.5 billion, annual total profit of CNY 1392.3643 million and profit of CNY 1044.2732 million after tax will be realized.

V. Project Implementation Agency

Sanyuan Economic Technological Cooperation Bureau

VI. Contact Information

Contact Person: Zhu Bo

Telephone: 029-32282496

I. Project Name***Construction Project of Fuxian County Comprehensive Logistics Park*****II. Project Description**

The project is planned to cover an area of 560 mu and build business office area, stuffing and de-stuffing area, container yard, parts and bulk yard and supporting facilities, and build a large comprehensive logistics park integrating warehousing, distribution, trade and information platform with an annual storage capacity of 250, 000 TEU of containers and 800, 000 tons of parts and sundry goods.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 375 million. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

Referring to the average profit status of the project of the same kind, after the project is completed and put into operation, the profit after tax will reach CNY 39.06 million and the investment recovery period will be 9.6 years.

V. Project Implementation Agency

Chafang Sub-district of Fuxian County

I. Project Name***Hancheng City Vein Industrial Park Project*****II. Project Description**

Covering an area of 271.5 mu, Hancheng Jingmai Industrial Park will invest CNY 670 million. It is planned to build resourceful and harmless treatment facilities for domestic waste, kitchen waste, municipal sludge, construction waste and medical waste. The park will be built in three stages, in stage I, it is to use domestic waste incineration for power generation. Based on the domestic waste incineration, the project can also treat solid wastes such as kitchen waste and municipal sludge; in Stage II, it aims at the recycling of construction waste and medical waste harmless disposal; in stage III, it is to build solid waste comprehensive sorting center, bio-mass comprehensive utilization and solid waste-based new energy vehicle charging yard, etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 670 million. Way of cooperation: BOT or Entrusted Management

IV. Anticipation of Market and Analysis of Investment Return

The investment recovery period is estimated to be 10 years.

V. Project Implementation Agency

Hancheng City Investment (Group) Co., Ltd.

VI. Contact Information

Contact Person: Yan Tao

I. Project Name***Green Solid Waste Economic Recycling Utilizing Project
of Hancheng Economic Technological Development Zone*****II. Project Description**

After the project is implemented, the solid wastes in Hancheng such as coal gangue can be recycled efficiently. Construction contents: plants, production line, equipment purchase and environmental protection facilities; management facilities (including lab, quality control room, safety monitoring room, etc.); intelligent management and control system for production, processing and sales.

III. Total Investment and Way of Cooperation

The project investment will be CNY529.9 million, it will be invested by the government or attract private capital to participate. Sources of funds: self-raised by enterprises, newly-increased central budget, special government bonds or financed by banks.

IV. Anticipation of Market and Analysis of Investment Return

The project has annual production value of CNY 1.2 billion, tax contribution of CNY 20 million and solve over 100 persons' employment problems. It may consume 300 tons of coal gangue. The investment recovery period after tax will be 12 years (including the construction period) .

I. Project Name***Nanocalcium Carbonate Production Project of Nanzheng District*****II. Project Description**

Relying on rich limestone resources in the district, the project is planned to build one nanocalcium carbonate production workshop, some nanocalcium carbonate production lines, meanwhile it is planned to build production workshops, office room, material warehouse, finished product warehouse and other supporting facilities.

III. Total Investment and Way of Cooperation

Way of cooperation: joint venture, sole investment or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

The construction of the project will further improve and build the downstream industrial cluster of calcium carbonate such as coating and sealant, and promote the intelligent and green development of calcium carbonate industry in this area. After the project is completed, it may produce 200, 000 tons of nanocalcium carbonate and realize annual value of CNY 600 million.

V. Project Implementation Agency

Nanzheng District Industrial Park Management Committee (The industrial park was originally planned as two parks and two areas, with a control area of 6.45 square kilometers. It has preliminarily formed an electromechanical industrial concentration zone with electronic products, precision instruments, equipment manufacturing and health instruments as leading industries, Liangshan Industrial Park with new materials, new energy, new building materials and fabricated buildings as the leading industries; featured food industry concentration zone with the advanced processing of modern agricultural products, biomedicine, warehousing and logistics as the leading industries, and Beiba Mining Park with ore mining and processing as the leading industries.) .

VI. Contact Information

I. Project Name***Distributed Photovoltaic Generation Project of Weinan
High-Tech Industries Development Zone*****II. Project Description**

The project is located in Weinan High-tech Zone, it is to build 100MW distributed photovoltaic power generation system on the roofs of public buildings in the industrial park, and photovoltaic modules and inverters will be installed. The project will adopt the “self-generation and self-use, residual power on-grid”, and the power generation margin will be integrated into the national power grid.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 460 million. Way of cooperation: investment promotion.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, annual power generation will reach 130MKW, annual production value exceed CNY 44 million and annual profit and tax over CNY 5 million.

V. Project Implementation Agency

Weinan High-Tech Investment Development Group Co. , Ltd.

I. Project Name***Construction Project of Energy Storage Base of Chengcheng Economic Technological Development Zone*****II. Project Description**

Chengcheng County is located in the northeast of Guanzhong Plain, rich in light and wind power resources. It is one of the top 100 counties of new energy industry in China and a pilot county of roof distributed photovoltaic power generation. In recent years, it focuses on photovoltaic and wind power, and the grid-connected new energy power generation project has a total installed capacity of about 2300 MW, and the newly-added “green power” generation capacity is about 3.5 billion kwh. In order to effectively solve the storage problem of the newly-added power generation capacity, it is planned to invite enterprises producing core parts such as energy storage integrated system equipment, electrical system, bidirectional inverter, complete cabinet, battery management system (BMS), etc.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 600 million. Way of cooperation: sole investment, joint venture or cooperation.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed, it will effectively solve the storage problems of power energy conversion from wind energy and solar energy. It is conducive to extending industrial chain and strengthening industry gathering. It has great promotion on improving the application of green and cleaning energy. After the project is completed, it is estimated that annual production value will be CNY 2.4 billion and provide jobs for 200 persons.

Comprehensive Utilization of 100, 000 tons of Agricultural Waste (Stalk , Branches) and Biological Fuel Project

**II. Project Description**

Having a covered area of about 83 mu and construction area of 63583m², the project is planned to build production workshops, warehouses, office, power distribution, parking lot, road hardening. It is to purchase forklifts, stalk shredders, tearing and dividing equipment, central control system, raw material blending and allocation system, dust removing and grinding system, heat die-pressure system, ultraviolet ray sterilizing system, automatic quantitative packing machine.

III. Total Investment and Way of Cooperation

Total investment of the project is CNY 200 million. Way of cooperation: sole investment or joint venture.

IV. Anticipation of Market and Analysis of Investment Return

After the project is completed and put into operation, it can use 100, 000tons of stalk, produce 20, 000 tons of stalk fiber degradable packaging bags, 40, 000 tons of high protein fodder making from stalk fermented by biological bacteria and 40, 000 tons of stalk fuel. After the project is completed and meets its production target, it will realize sales income of CNY 100 million, tax not less than CNY 15 million. It will increase 500 positions.
